WILL DECIDE FATE OF DISTRICT 2 TOMORROW

OPERATORS HOLDING BACK ACCEPTANCE OF LEWIS' SCALE

Pittsb'g Producers Late
Today Refused to At-
tend Conference With

OTHERS GIVE VIEWS

Pittsburgh Producers Refuse to Meet
Union Officials.

Pittsburgh, Pa., Aug. 16.—The sub-scale committee of the Pittsburgh Coal Producers Association today again refused to meet with representatives of the miners' union here Friday to negotiate a settlement of the strike on the basis of the Cleveland conference. The Pittsburgh producers in which the Pittsburgh Coal Company is the dominating factor controls 60 per cent. of the tonnage in Western Pennsylvania.

Secretary Davis Optimistic.

Washington, D. C., Aug. 16.—Scores of coal operators who did not attend the Cleveland peace meeting have signified their intention of joining in the strike settlement, Secretary of Labor Davis announced today. Davis estimated that operators who signed the agreement represented an output of 2,000,000 tons of coal weekly. Representatives of the Labor Department informed him that the producers of another 2,000,000 tons weekly who were not represented at the conference will adhere to the agreement reached there within a few days. An anthracite settlement is imminent, Davis stated.

Cleveland, Ohio, Aug. 16.—John L. Lewis, president of the United Mine Workers, is expected to issue instructions to district mine officials to place the agreement reached here yesterday before operators of their districts at once.

If the operators sign the agreement as Lewis predicts the bituminous strike will be ended in 75% of the soft coal districts.

Following the reporting of the agreement Lewis issued a statement in which he heralded the pact as a complete victory for the miners. Lewis said "I esteem this termination of the conference as being especially gratifying, not only to the mine workers, who have emerged from this great industrial conflict with signal honors, but to the American people as well. The settlement is an honorable one to all concerned."

Associations Meet

Pittsburgh, Pa., Aug. 16.—Peace or continued warfare in the soft coal fields of Western Pennsylvania hinged today on the outcome of meetings of two operators' associations controlling 80% tonnage. Scale committees of the Pittsburgh Coal Producers Association and the Freeport, Thick, Vein Operators' Association meet here today to take action on an invitation from District No. 5, United Mine Workers, to negotiate a settlement on the basis of the agreement reached at the Cleveland conference.

New York, Aug. 15.—Agreement between operators and miners at Cleveland will result in a general acceptance of their terms throughout the coal mining industry, and a nationwide end of the strike, notwithstanding the relatively small representation of operators at the Cleveland conference, officials of the National Coal Association declared here today.

Phil. Penna Defiant

Terre Haute, Ind., Aug. 16.—"The action of the Cleveland conference in reaching agreements is of no consequence to the Indiana Bituminous Coal Operators' Association," said Phil H. Penna, secretary of the association when apprised of the developments there. "Our association was not represented," continued Mr.

(Continued on Page Seven)

Text of Agreement Made at Cleveland

Cleveland, Aug. 16. The text of the agreement made by the United Mine Workers' representatives and some of the coal operators at the Cleveland conference follows:

First.—All mine of operators represented in this joint conference which are now on strike, are to be opened immediately upon the execution of supplementary contracts extending to March 31, 1923, the terms, provisions and conditions of the contracts affecting such mines as they respectively existed on March 31, 1922, except as to renewal or continuation clauses in such contracts.

Second.—The participants in this conference agree to send, and this conference invites the bituminous coal operators of the United States to send representative delegates, from coal-producing districts, or from substantial groups of operators, which delegates shall as far as possible be representatives of the bituminous coal industry of the United States, such delegates to assemble in joint conference in Cleveland, Ohio, October 2, 1922.

This joint conference shall appoint a committee of equal numbers of representative operators and miners, which committee shall formulate a method to be followed by the bituminous coal industry in the negotiation of wage scale agreements to become effective April 1, 1923, and the method so formulated shall be followed by the committee reported to the joint conference to be held January 3, 1923, as hereinafter provided.

Third.—The joint conference convening October 2 shall further select a committee of inquiry, the members of which shall be of commanding public reputation for character and ability, and whose personnel shall be approved by the President of the United States. The duty of this committee shall be to develop all of the pertinent facts in regard to the industry for the benefit alike of the public, the operator, and the mine workers.

Such investigation shall include every phase of the industry deemed material by the committee of inquiry, and such committee shall be furnished with all information desired and aided in every manner possible by the operators and miners alike.

In the event such joint conference shall fail to agree upon the members of such committee of inquiry by October 10, 1922, it shall petition the President of the United States to appoint the members thereof in his discretion, and in the event of a vacancy the President is requested to fill same by appointment. The cost of such committee of inquiry shall be paid by the industry, one-half by the operators participating in the joint conference and one-half by the United Mine Workers of America.

Such committee, after developing all the facts, shall make such recommendations as it may deem

proper and advisable, and shall, so far as possible, embody these recommendations in a report to be submitted to the joint conference to be convened January 3, 1923, as hereinafter provided.

In order to reach a final and proper determination of the controversy in the bituminous coal industry, for the benefit of the miners and operators and the public as well, the following principal points are presented for consideration by the committee of inquiry:

Opportunity for Saving.

(A) The wage rate in any district shall, as far as reasonable, be properly competitive within the mining industry and shall at the same time be fully compensatory to the miners, being sufficient to afford not only a living wage, but also to allow reasonable opportunity for accumulating savings.

(B) The encouragement of a proper spirit of obligation and responsibility on the part of all parties towards contractual obligations and the establishment of proper machinery, both local and national, for prompt determination and settlement of any points of dispute in any local, State or district contract without resorting to strike or lockout.

(C) The determination of a proper policy to encourage efficiency of operation not only on the part of mine management in the mechanical operation of the mines, but also on the part of individual miners in the performance of their daily work.

Fourth.—The participants of this conference agree to send, and this convention invites, the bituminous coal operators of the United States to send representative delegates from coal-producing districts, or from substantial groups of coal operators, which delegates shall, as far as possible, be representatives of the bituminous coal industry of the United States, such delegates, to meet in joint conference January 3, 1923, at such place as may be designated by the joint conference held October 2, 1922. The joint conference shall receive the report from the committee appointed in conformity with paragraph two, and shall finally determine the method to be followed by the participants in the conference in the negotiation of wage scale agreements to become effective April 1, 1923.

To the end that the new wage scale agreements to be effective April 1, 1923, shall be determined upon as speedily as practicable, and further strikes be thereby averted, the method of negotiating wage agreements which shall be determined upon by said joint conference shall provide that such machinery as is created by it to develop a new wage scale agreement shall commence to function not later than January 8, 1923. The wage scale agreement concluded by such machinery shall be effective April 1, 1923, and shall be in effect during such time as it may determine.

WATKINS LAUDS NEW AGREEMENT AS NEW ERA IN INDUSTRY

Virtual Acceptance Of
Harding's Plan, Says
Man Who Served On
Hard Coal Commiss'n.

LOOKS FOR PEACE

T. H. Watkins, president of the Pennsylvania Coal and Coke Corporation and a member of the memorable Roosevelt Anthracite Strike Commission, who has a wide experience in industrial affairs, issued the following statement at the close of the Cleveland conference.

"As a result of conciliatory efforts inaugurated by President Harding at the Washington conference, a constructive agreement has at last come out of the Cleveland meeting. The central competitive field conference, to which we attribute most of our past difficulties, was definitely broken up and abandoned yesterday and the meetings were thrown open to operators and miners from every district in the United States.

The method of renewing contracts expiring March 31, 1923, is left to a joint committee of miners and operators which will report on January 3, 1923. All parties have engaged themselves to exert every effort toward the amicable negotiation of equitable wage agreements next spring.

The outstanding feature of the new agreement is the incorporation of a law providing for the selection of a commission of inquiry composed of prominent and unbiased citizens instructed to make a most exhaustive investigation of the whole industry and to lay down recommendations upon which future voluntary agreements can be negotiated on sound economic lines between the operators and the miners.

For the first time in the coal industry important labor leaders and employers have joined together in a crisis and voluntarily set up the machinery, not only for a resumption of work, but for the establishment of a public tribunal before whom they engage themselves to appear with all the facts of the industrial activities of both parties. The recommendations of this commission are to be the guide for necessary steps toward a permanent solution as well as for future agreements negotiated without interference or compulsion except as both sides must how to the powerful opinion of a well-informed public.

The document means that reason has been restored to the coal industry. The exercise of force, whether through strikes, compulsory awards or arbitrary procedure, has no place in the program upon which we have agreed. Compulsory arbitration has failed too often in recent industrial crises, to offer any hope of effectiveness, in a situation which requires a basic solution, not merely a reconciliation of immediate difference.

We believe that the door has been opened to a new era in the coal industry in which the consuming public as well as those engaged in producing coal will have full access to the essential facts of the industry and an influence in guiding it into more peaceful and stable channels."

MOTORIST FOUND SHOT THRU CHEST NEAR PITTSBURGH

Pittsburgh, Pa., Aug. 16.—Shot in the chest while sitting at the wheel of his machine, George Schuler, aged 32, of Carnegie, was found early today on the Steubenville pike by a fireman on the Panhandle road. Robbery was not the motive for the crime as a sum of money was found in Schuler's pockets.

(Continued on Page 2).

TEN CHILDREN AND TWO ADULTS BURN TO DEATH IN ORPHANS' HOME FIRE

SHAWBRIDGE, Quebec, August 16.—Ten children and a man and a woman were burned to death early today in a fire which totally destroyed the Jewish Boys' Home here. The dead are Thomas Leganet, caretaker, his wife, Jean Leganet, aged seven, Marie, aged fourteen, and eight orphans ranging in age from six to sixteen. Collapse of the building where the victims were helplessly trapped threw the vicinity into darkness by destroying a local lighting plant, thus adding to the horror. Only the fact that a majority of the orphans slept out of doors prevented their perishing in the holocaust. Twelve bodies were recovered but some of them were so badly charred they could not be identified today.

Hay's Not Concerned In Hart's Affair

Both Bill Hart and Will Hays have denied that the latter attempted to effect a reconciliation between Hart and his bride of less than a year, Winifred Westover. She says she will soon bring suit for divorce alleging cruelty. Hart denies her charges.

AUTO VICTIM DIES AT RIDGWAY; BROUGHT HOME FOR BURIAL

Elma Williams, the little 9-year old daughter of Mrs. Nina Williams, of South Fourth street, who was seriously injured in an auto accident near Ridgway on Saturday evening last, passed away at the Ridgway Hospital last evening at 5 o'clock.

Little Elma, with her mother, her brother Leonard, half brothers Ray and Ed Gallagher and the latter's wife left Clearfield Saturday in the Gallagher's Nash car to go to Ridgway. While ascending a steep hill on the Boot Jack road near Ridgway they caught up to a Ford car also going toward Ridgway. Ed Gallagher was driving and sounded his horn as notice to the driver he was about to go around him. The Ford started to turn out to let the car pass but the driver stalled his engine and stopped his Ford diagonally across the road. Mr. Gallagher turned his car sharply to avoid a collision and slid slowly into a ditch at the side of the road, the car toppling over.

Little Elma had been sitting on her mother's lap but when the others extricated themselves from the wreck they found the little girl under the car. A hinge on one of the doors had struck her in the side just under the arm and crushed her ribs. When she was taken out she walked some distance up into a field along the road and then collapsed.

She was taken to the Ridgway Hospital where everything possible was done for her, but it was of no avail. A couple of her ribs had been crushed, the broken bones penetrating her lungs. She became unconscious on Sunday and remained in that condition until the final summons came at 5 o'clock last evening.

VARDAMAN, WILSON FOE, HAS A SLIGHT LEAD FOR SENATE

Jackson, Miss., Aug. 16.—Former Senator James A. Vardaman, bitter foe of Woodrow Wilson, today was leading in the Mississippi Senatorial primary by fewer than 200 votes on returns from 71 out of 82 counties. Backers of Hurbert G. Stephens, running on a pro-Wilson platform, were confident he would nose out Vardaman when complete returns are in, but it was admitted that a "run off" primary probably would be necessary because of the State law requiring that a nominee must get a majority of the votes.

Miss Belle Kearney, the woman candidate in the Senatorial race, polled about 15,000 votes.

Germany Deposits Five Million Marks, Saying It Is All She Can Pay

Berlin, Germany, Aug. 16.—We have paid all we can, Chancellor Wirth stated today in announcing that 5,000,000 gold marks had been deposited in the Bank of England as a payment on their debt. Marks today slumped to 4700 for a pound sterling, or over 1000 for the dollar.

MAJOR REED WILL BE U. S. SENATOR TODAY

Washington, D. C., Aug. 16.—Major David A. Reed, who is to be sworn in as the new Senator from Pennsylvania today to succeed the late William E. Crow, called at the White House this morning and left his card. He was accompanied by Senator George Wharton Pepper and Governor William C. Sproul. They did not see the President as he was not in.

DISTRICT NO. TWO OPERATORS WILL MEET TOMORROW

General Meeting of Both
Associations Called at
The Dimeling To Take
Action On Agreement.

MEET AT TWO P. M.

The fate of District No. 2 is to be decided tomorrow afternoon when members of both the Association of Bituminous Coal Operators and the Central Pennsylvania Coal Producers Association will hold a joint meeting here to decide on a course of action on the wage scale made at Cleveland. The local associations were not represented at Cleveland and little is known today as to their attitude beyond the individual expressions made with considerable frequency. There is a likelihood that the District No. 2 operators will vote to re-open their mines, but it is quite apparent that a great number of the operators are not favorable to doing so.

So far as can be learned, the only large operator in the District No. 2 field who has signed up on the new scale is the Pennsylvania Coal & Coke Corporation with mines at Winburne, Patton, Arcadia, Crescen and a dozen or so other coal fields in Indiana and Cambria counties. The Progress learns that the Clearfield Bituminous Coal Corporation also is planning to start up within a day or so and there is a report current that the Allegheny River Coal Company, a subsidiary of the Pittsburgh and Shawmut Railway, has signed up. None of the mines in this district are yet in operation as Mr. Brophy has not yet returned to this field with the agreement forms and the local union officers are without authority to direct a return to work until Mr. Brophy returns.

Prior to the general meeting of the operators here tomorrow, which will be held at the Dimeling hotel at two o'clock, there will be an executive meeting at eleven o'clock.

COUNTER SUIT IS FILED AGAINST E. T. CHANDLER, SPORT

Atlanta, Ga., Aug. 16.—Mrs. Sara Gillespie Byfield today filed suit for \$100,000 against Ealter T. Chandler, sportsman and capitalist stating that he caused her personal humiliation in an attack upon her on board the steamer Berrangalia enroute to France. The suit followed an action brought by Chandler against Mrs. Byfield's husband, Clyde Byfield, charging blackmail.

Describing the incidents following the champagne supper aboard the Berrangalia on the night of July 10th, the petitioner stated: "Finally the petitioner, Mrs. Byfield, and her husband left the party and went to petitioner's stateroom to retire for the night. After getting there, petitioner's husband stated that they had left the party somewhat abruptly and in a way which might be construed as rudely, so he said he would go back and stay with the party for a while. When petitioner's husband had left her, she was preparing to sleep. A short time after petitioner's husband left her, Chandler opened the door, drew the bed clothing off her, disheveled her night clothes and grabbed her in his arms. Petitioner screamed and continued to scream until her husband rushed into the room and immediately engaged in a desperate fight with Chandler. Following this scene, Mrs. Byfield became ill and has remained ill from that day to the present, the statement alleges.

Odell Houser, political scribe on The Philadelphia Ledger, is spending some time here, the guest of Frank Short, son of John F. Short.

Woman's Part.

We have not yet sufficiently studied the part of women, or claimed their help. They have a power of spiritual vision which men have not. It was not an accident that a woman was the herald of the Resurrection. She may be yet again, in a fuller spiritual sense. To women great ideals are natural. They have an intuition of the whole of things. They have capacities for training and education which we have not yet used.—Bishop Westcott.

Free Public Schools in Old Rome.

By the Fourth century in the Roman empire there was a system of free elementary schools for the children of all workers; a system of free secondary schools for the better pupils, and a number of special schools (like universities) which also could be reached without payment by the poor. The municipalities everywhere were compelled to maintain these.—J. McCabe in "The Evolution of Civilization."

Caught at Last!

Rosa Ponselle, operatic prima donna, has been trying for three years to catch a square-tailed, speckled trout at Carlestown, Me. She got him this summer. He weighs nine pounds, three ounces.

ODDS AND ENDS AND THINGS

By J. D. C.

The following extracts from an article from the pen of H. B. Douglass, a former Clearfielder, concerning the history and achievements of the Clearfield Bituminous Coal Corporation, published in the New York Central Lines magazine, should prove of interest generally:

Comparatively few employees of the New York Central Lines are familiar with the extensive coal holdings and activities of the Clearfield Bituminous Coal Corporation, and doubtless, fewer still realize the great economic value of this sturdy subsidiary to the parent railroad company. The New York Central is indeed fortunate, not only in the possession of so vast a field of high-grade coal, but also in the fact that the greater portion of it is located on its own line of railroad.

Mines Opened in 1860.

The Clearfield Bituminous Coal Corporation had its inception in the old McIntyre Coal Co., operating at McIntyre in the northeast corner of Lycoming county, Pennsylvania. C. J. Langdon of Elmira, N. Y., was president of this company and George H. Platt, superintendent. The mines were opened in the 60's, the latter map bearing the date of 1873. We know little of this company. Tradition informs us, however, that the coal was three feet in thickness, of good quality, and found a ready market in New York and Canada. Today we look in vain for the village of McIntyre. An ancient cemetery is all that remains, for it was one of those ephemeral towns that follow the pick and disappear with the coal.

The McIntyre Coal Company's property was nearing exhaustion in the early '80s, and President Langdon cast about for additional acreage. Associated with him in this new enterprise were such men as W. K. Vanderbilt and Cornelius Vanderbilt of New York; Joseph M. Gayman and John G. Reading of Philadelphia; General George J. Magee of Watkins, New York; S. R. Peale of Lock Haven, Pa., and William A. Wallace of Clearfield, Pa., all of whom appear as directors in the new company formed. This company was known as the Clearfield Bituminous Coal Company, and received its charter and letters patent December 27, 1882.

In 1882 the company acquired 22,150 acres of land in Rush and Snowshoe townships, Centre County, and Cooper township, Clearfield county, Pennsylvania. In 1883 the coal was opened and the village of Peale, named for S. R. Peale, laid out. Located in a wooded section of great natural beauty, at the confluence of Moravian Run a small trout stream, and Mochannon Creek, Peale was considered in its day, and undoubtedly is a model mining town.

The western terminus of the Beech Creek Railroad, Clearfield and South Western Railroad was, at this time, at Snow that in the beginning all material had to be hauled in by team from that point. It was not until 1884 that the railroad was extended to Vinuet, two miles west of Peale and rail shipments began. In 1883 the Clearfield Company purchased 11,720 acres of coal in Jordan, Ferguson, Knox and Greenwood townships, Clearfield county. In the year following, the coal was opened and the town of Gazzam established.

Pioneers Worked Well.

The development of a large coal property, viewed from any angle is a serious affair. In no other field of endeavor are initial mistakes so costly, and so hard to correct; and so it is most refreshing to record here that the pioneers of the Clearfield Bituminous Coal Corporation did their work faithfully and well.

There was one stockholder of record, however, who, it is safe to assume, did not take the mining game seriously. He was none other than Samuel L. Clemens (Mark Twain), a brother-in-law of President Langdon, and owned all of six shares. "Old Timers"—a few of them are still with this Corporation—delight to tell of a week this great man spent at Peale; and of how he put in his days prone upon the office floor, his back against an overturned chair, smoking and reading. It is easy to visualize the gentle humorist in his favorite reading posture; and one can readily believe that his active mind enjoyed to the full whatever of human interest went on about him, and stored it away for future "copy."

But all this is ancient history. Gazzam has disappeared; the picturesque village of Peale is but a memory; and the trout leap no more in the contaminated waters of Moravian Run. The men who inspired and engineered the project have long since passed on, and their passing indeed mark the end of an era. Machinery, in its application to the mining industry, was

coming into its own, and in its progress gradually crowding out the old skilled pick miner. And with these latter departed whatever romance there was in the mining of bituminous coal.

In 1886 the Clearfield Company was taken over by a new organization chartered under the name "Clearfield Bituminous Coal Corporation." In the same year the New York Central & Hudson River Railroad Co. leased the Beech Creek, Clearfield and South Western Railroad and operated with the title "Beech Creek Railroad, N. Y. C. & H. R. R. Co., Lessee." In 1899 the Central took over the Fall Brook Railroad and the Beech Creek Railroad and consolidated them into the "Pennsylvania Division." It is of special interest to note that President F. E. Harriman of the Clearfield Bituminous Coal Corporation, was an official of the old Beech Creek Railroad, and that he was appointed, at this time, Division Coal Agent of the Pennsylvania Division, with headquarters in New York. He was subsequently made Coal Traffic Manager of the New York Central and resigned this position in 1917 to become an attaché of the office of President A. H. Smith, his task being the coordination of the railroad's coal properties.

About this time the Clearfield Corporation ceased its commercial activities, and became what it is today, strictly a railroad fuel proposition. Aside from a small portion of the tonnage consumed in the Corporation's power plants, and sold locally to employees for domestic use, the entire output goes to the New York Central Railroad for supply.

Large Area Supplied.

The New York Central executives early saw the advantages to be derived from coal land ownership, and wisely encouraged in their subsidiary a rapid and healthy expansion. From 1902 to 1916 the Clearfield Corporation had acquired 127,123 additional acres in Cambria and Indiana counties, bringing the total acreage up to 161,293.

It is the policy of the Corporation to sell or lease such territory as it cannot economically exploit and in this derive a revenue to pay in part the carrying charges on the entire property. This policy has resulted in the sale of approximately 11,000 acres, and a lease of 49,330 acres, leaving about 100,000 acres to be developed, sold or leased as conditions warrant.

The Clearfield Corporation is developing and mining five fields, viz., Cooper in Clearfield county; West Branch in Cambria county; and Rosister, Clymer, and Purchase Line, in Indiana county, Pa. Cooper Colliery is producing Lower Kittanning coal; the four mines at Commodore in the Purchase Line field are operating on the Upper Freeport seam, while Barr Slope and Sample Run collieries in the Clymer field and the West Branch operation are mining the Lower Freeport. These coals all possess high fuel values. The Cooper coal is especially notable, not only as a strong steamer, but as a fuel so low in volatile matter as to be practically smokeless. It is in great demand for use in yards and stationary plants located in cities.

These mines are all located on the

FARM FOR SALE

I offer the following farm and its contents for sale at a real bargain to a quick buyer. Just the farm for any man to make a good investment and start in farming.

Farm known as the James Northern farm, located in Lawrence township near O'Shanter, Pa. Five minute walk to New York Central station.

Acres: 85.
50 acres cleared in good state of cultivation.

25 acres in woodland estimated as follows:
30,000 spruce,
10,000 motor ties,
9,000 feet hemlock,
15,000 feet of pine,
10,000 feet of hardwood,
200 Railroad ties.

This farm is underlaid with three seams of coal, namely B, C, and G Prime good workable seams.

Good eight-room house practically new. Good barn forty feet square. Two good work horses that weigh 1,200 each. Two good milk cows. Four head of young cattle. Seventy-five chickens, two hogs, wagon and harness, cow horse, plough, drop reaper, mows and mowing machine, and various other implements too numerous to mention. Twelve tons of timothy and clover hay in the barn. Two hundred and twenty dozen of oats, five acres of good corn. Five and one-half of good buckwheat. Three acres of good wheat, one and one-half acres of potatoes.

Good peach orchard on the farm. Good apple orchard on the farm. Good spring water on the farm. Running water in the house. House is illuminated by acetylene gas.

For particulars communicate by letter or by phone, Room 6, Penn. Public Service Building, both phones: H & C, 492, Bell, 194, Clearfield, Pa.

Isaac H. Robinson

Pennsylvania Division, New York Central Railroad; produce annually a million and a half net tons; and have a developed capacity of approximately two million tons. The fields are being developed along scientific lines and the mines worked in accord with the best mining practice, having always in mind conservation and by central plants located at Rosister and Clymer, is used throughout for hauling, mining, pumping, ventilating and lighting.

Today's Wise Word.

"The soul shall have society of its own rank."—Lafcadio Hearn

ATTENDING FIREMEN'S CONVENTION

A delegation of about fifteen of the members of Columbia Fire Company of Osceola passed through Clearfield this morning in a handsome little motor driven hose car en route for the District Firemen's Convention at DuBois.

British Metropolis Ancient City.

London is at least as old as the Roman conquest of Britain (43 A. D.), and there was probably an old British town in the same place before the Romans made an important city of it.

HAWK RUN GIRL BADLY BURNED

Miss Priscilla Stevens, 23 years old, a daughter of Josiah Stevens, of Hawk Run, is at the Cottage State Hospital suffering from severe burns. She was raking up the fire in the stove when a brand came into contact with her dress, setting it afire. One side of her body was most painfully burned.

His Only Fear.

In an English court—"This man is a terror. The only thing he is afraid of is his coffee color."

Look for the Atlantic tank in front of good garages and oil stations.

Atlantic Medium contains only those crude-oil hydrocarbons peculiarly suited to internal combustion engine lubrication. Its resistance to change in "body" at widely varying temperatures gives it the advantage of much heavier oils, while still retaining the free-flowing mobility of "medium."

It leaves little carbon in the combustion chamber; nor does it gum valves or foul spark plugs. After use, even though diluted by the absorption of fuel vapors and contaminated with foreign matter in the crankcase, Atlantic Medium can be restored to its original condition. This shows that the character of the oil is not appreciably changed by use.

Put Atlantic Medium in your crankcase and see for yourself how completely this oil lets a man take his mind off his motor and concentrate it on the pleasure of motoring.

ATLANTIC MOTOR OIL Keeps Upkeep Down

Note these New Prices on U.S. Tires

ON July 29, 1922, the lowest prices ever quoted on U.S. Passenger Car Tires went into effect—Royal Cords included. These new prices should give confidence to dealers and car owners that no lower basis of quality tire prices will prevail.

Bear in mind that these prices apply to the most complete line of quality tires in the world. Remember, too—as you read the following table—that U. S. quality has been positively maintained.

SIZES	Royal Cord	Nobby	FABRIC	Usco	Plain
30 x 3 CL	112.55	114.40	99.75	\$9.25	
30 x 3 1/2 "	146.65	156.00	106.65		
31 x 4 "	146.65	23.00	21.35	18.65	
30 x 3 1/2 "	22.95	20.45	16.90	15.70	
31 x 4 "	26.45				
32 x 4 "	29.15	24.35	22.45	20.84	
33 x 4 "	30.05	25.55	21.65	21.95	
34 x 4 "	30.05	26.05	24.15	22.40	
32 x 4 1/2 "	37.70	31.95	10.05		
33 x 4 1/2 "	38.55	33.00	31.05		
34 x 4 1/2 "	39.50	34.00	32.05		
35 x 4 1/2 "	40.70	35.05	33.55		
36 x 4 1/2 "	41.55	36.15	34.00		
33 x 5 "	46.95				
35 x 5 "	49.30	43.20	19.30		
37 x 5 "	51.85	45.75	11.70		

Federal Excise Tax on the above has been absorbed by the manufacturer

The dealer with a full line of U. S. Tires at these new prices can serve you better than you have ever been served before in the history of the automobile.

If there were any fancied advantage in shopping around for tires it disappeared on July 29, 1922.

THE GREAT UNIT OF POWER

Former Senator Cole, of California, nearing his hundredth birthday, has come to much wisdom with his years. Among other things he has decided that "we really never are headed for perdition, no matter how numerous are the signs in that direction." As a man who has lived while the nation has grown from 3,000,000 to more than 110,000,000, he should know and, as he points out, it has never gone to perdition yet.

One of his convictions, allied to this opinion, is that the family is the unit in the political system of the country. While he suggests thereby a slight distrust of woman's suffrage, in a broader way it reflects Mr. Cole's basic confidence in the duty and ability of the American home to control the national destiny.

This was true when only 3,000,000 persons lived in the United States. It is true today. Beside the limitless power of the American home the strutting and mouthing of little politicians is silly. Yet, simply by disuse, that great power of the American home has been snatched up by a few men in almost every community who use it for the exploitation of selfishness. The power still exists, is reclaimable whenever the American home decides to do so, but for the present, during recent years it is "borrowed" and used while the owner's back is turned.

It is the recovery and use of this power by the American home that is the greatest task facing this nation today. No other problem compares with it. It is the practice of the theory enunciated in the constitution. It is the proof, always needing restatement as generations change, that democracy is successful and that it is possible for a nation to govern itself intelligently by common judgment.

High patriotism today would make national representation the supreme topic of discussion in every American home. What burdens the home most? Taxation. What is the most important job facing the government? To get out of debt and stay out of debt, thus reducing taxes. Who can effect that? The national representatives, if—if they are big, capable patriotic servants of the public.

The nation has run the gamut of political emotions these last few years. It has seen the result of its negligence in political scandals in confiscatory taxation, in unnecessary strikes, in profiteering, and in many other ways. Methods have been changed to meet new conditions. But one thing remains unchanged, and that is the power of the American home to write its own history, decree its own taxes, and command the forces, all lesser than itself, which contribute to its liberty and prosperity.

FOR LESS WILL POWER

It is becoming more difficult as time goes on to read the text of a periodical without meeting the self-improvement salesman. He's there every month in the front of the book with a scheme to make your lungs as capacious as a blacksmith's bellows and your memory as enduring as that popularly ascribed to the elephant. He seeks to plant in you a desire for biceps as powerful as Mr. Zbyszko's and a will as unyielding as Gibraltar.

Especially is he anxious about your will power. He insists if you say every morning, "I will have a million dollars before I die," that eventually that prospect will materialize.

This may be entirely true, and a strong will may be capable of scaling any height. But much depends on the task set for the will. It might be as well in the end if there were courses arranged for deflation of a lot of the will power in the world. A movement for weaker wills would stop, among other things, all future wars for it would do away with a vast amount of selfishness. A will as inflexible as Everest is not particularly precious if it is exercised in trampling on the rest of humanity to reach a seat in the sun.

Lincoln did not repeat the "I will" formula periodically. Historians seem to agree that he groped along in a consciousness that he was an instrument of God.

The picture of the downy sophomore clenching his fists before the mirror and parroting the mystic ritual is engaging. But perhaps it would be better in the beginning if he substituted faith for gymnastics in will power. Faith moves men forward with no loud gritting of teeth and digging of nails into the palms. The will developer is apt to be an annoyance to himself and a nuisance to his friends. Faith annoys none, and it is a lot more comfortable than looking intense and cutting a neighbor's throat.

LIQUID ASSETS

The aim of the County National's management has always been to keep its assets, in so far as possible, in liquid shape, so that every customer entitled to credit can be accommodated on request.

At the time of the latest statement, the bank had cash assets, (cash on hand or deposited with other banks and demand loans) of \$1,064,623.83.

For many years the County National Bank has not found it necessary to refuse a request for a loan on account of lack of available funds.

Your account is invited on the assurance that you may obtain such loans as your financial condition and your account with the bank warrant.

ONLY WOMAN MAJOR IN ARMY

Julia C. Stinson, Dean of School of Nursing, Served as Chief Nurse of Red Cross.

The most intense of the army nurse corps, and dean of the Army School of Nursing, is the only woman major in the United States army. Maj. Julia C. Stinson served as chief nurse of the American Red Cross in Paris and later as director of the American expeditionary forces nursing service, with 10,000 nurses, under her control during the World War, before becoming superintendent of the army nurse corps and head of the school of nursing.

Major Stinson was born in Worcester, Mass., and graduated from Vassar when barely twenty years of age. She first went overseas as chief nurse of the St. Louis unit, base hospital No. 21. She holds numerous awards and citations for her services during the war.

One of the major's most recent experiences was the honor of christening the army transport Claumont. "General Pershing was there," Major Stinson said in speaking of the event, "and I spilled champagne all over the general's best uniform when I broke the bottle over the bow."

FEW BUCKS NOW IN U. S. ARMY

Number of Trained Doughboys Has Been Reduced, Bringing Total to Not More Than 20,000.

Doughboys—just plain black privates of infantry—are becoming almost as scarce in the regular army as shavetails were some time ago. Every time there is a reduction in the size of the army, the number of buck privates is very perceptibly cut down. At the present time, it is said that there are not more than 20,000 plain, unspecialized "bucks" in the ranks of the United States army. There are only 47,837 men in all branches of the foot regiments while there were more than 53,000 enlisted men in the infantry when the war started in April, 1917.

Impending additional reductions in the size of the army will show a further drop in the number of privates, officers say, and leave the infantry only a framework of highly trained specialists with just a few humble bayonet-wielding bucks here and there to give a sketchy suggestion of a wartime force.

This framework of specialists will be maintained, the War department declares, so that in an emergency the army may be able to quickly expand filling in the vacant ranks with raw recruits who, with a few weeks' training, will make our fighting forces a highly trained machine.

PREFERS TO MARCH AS 'BUCK'

Brig. Gen. William V. McMaken, Ohio, Has Served His Country for Forty Years.

William V. McMaken of Toledo, O., who was a brigadier general in the service to which he gave 40 years of his life, says that he prefers now to march as a "buck" in the rear rank at patriotic and memorial demonstrations since his military career is over. But this modesty sometimes causes him a little embarrassment. During the American Legion parade at the national convention in Cleveland, in 1920, when Mr. McMaken marched in the ranks, he received the "bawling out" of his life from an erstwhile hard-boiled sergeant who noticed that the former brigadier general had failed to "dress right."

Mr. McMaken was a brigadier commander in the Thirty-seventh division during the World War.

Carrying On With the American Legion

A memorial to the marines who were once students of the University of Minnesota has been unveiled on the university campus.

An entire island in the Maumee river, 20 miles from Toledo, O., has been bought by a Toledo Post of the American Legion to be used as a vacation resort.

Athletic and playground equipment for seven playgrounds in Buck's county, Pennsylvania, has been presented to each of as many communities by the American Legion.

A special troop of boy scouts who could not pay their entrance fees into the scout organization were organized and given their uniforms and equipment by the American Legion at Ottumwa, Ia.

The \$900,000 remaining unexpended following the payment of the New Jersey state loans to former service men may be used by the American Legion to provide hospital accommodations for incapacitated ex-soldiers.

LIVE STOCK

PREVENT LOSS IN SHIPPING

Partitions in Stock Cars Separating Large Animals From Small Ones is Good Idea.

(Prepared by the United States Department of Agriculture)

A little time and labor, possibly a little money, expended in building a strong partition to separate the big animals from the small ones in a mixed carload of live stock frequently saves the shipper from a serious loss on the consignment, say specialists of the bureau of markets, United States Department of Agriculture. The smaller animals, such as hogs, lambs, goats and sheep are always in danger of injury from the larger animals, and this is especially true when the car is overcrowded.

Crippled animals mean a loss to the shipper, for they bring prices considerably below the regular market price for sound stock. Dead animals bring still less—in the case of hogs only about 50 to 75 cents per hundred pounds for prase. There is always the danger, too, of the small stock becoming bruised, through being jostled and kicked by the larger ones. Bruises make a carcass less valuable, as the meat inspectors in the slaughterhouses cut out all bruised spots. Meat thus mutilated is sold as cheaper grades, the depreciation depending upon how much cutting was necessary. The buyers in the stock yards know this, of course, and, consequently, pay less for animals that

Goats Cleaning Out Weed Patch.

show bruises or seem likely to have suffered in this way.

Buyers are afraid of bruised stock, and for this reason are suspicious of small animals arriving at the stock yards in a mixed carload where the larger animals are not partitioned off. Such injuries are difficult to detect in the live animal but when small stock, such as calves and lambs, arrive in a badly soiled condition buyers usually suspect they have been trampled and bruised by larger animals, and as a rule the buyers play safe by paying less money for such stock.

MORE BROOD SOWS ON FARMS

Increase of 1,237,000 Over Year Ago Is Seen, Due Largely to Big Stock of Corn.

There were 12,424,000 breeding sows on farms April 1, the United States Department of Agriculture estimates. This is 1,237,000 animals more than on the same date in 1921 and represents an increase of 11.1 per cent.

The large corn crop last year and the unusually large farm stocks of corn are given as the explanation of the large increase in breeding sows this spring. Corn was worth more as pork than as corn, and hogs were needed to eat the corn.

The number of hogs is quickly responsive to the general economic situation, the department points out. In April 1918, the number of breeding sows was 9.5 per cent more than on the same date in 1917, due to high hog prices as a result of war conditions. The figures on April, 1920, show a decline of 10 per cent for the year ended on that date. The reason for this was that the price of corn was relatively too high to encourage the feeding of hogs.

FINE FORAGE CROPS FOR PIGS

Rape Is Rich in Protein, While Alfalfa Will Carry More Animals Per Acre.

Rape is rich in protein, and is almost equal to alfalfa as a forage crop for pigs. The chief advantage to alfalfa lies in the fact that it will generally carry more pigs per acre, and does not need to be reseeded each year.

Make Land Pay More.

Purebred live stock on every farm would go far toward making high priced land pay 6 per cent net on its value.

Have Purebred Females Too. Of course the purebred sire is the first step, but there's no good argument against purebred females in live-stock improvement.

Take Care of Animals. Take good care of the animals now and they will take care of you later.

ALL OVER BUT THE SHOUTING!

STEEL HELMETS

Just the thing for hanging flower pots or fern pots, or they make a great lamp shade.

ROSS & WOODS

News of : Our Neighbors CURWENSVILLE

Gilbert Landy of Mahaffey was a Curwensville visitor yesterday.

Mr. and Mrs. C. A. Rorabaugh returned to their home yesterday after visiting their daughter, Mrs. Harry Wilbur of Youngtown, Ohio, for several weeks.

P. A. Zetter, of Youngsville, Pa., a teacher in the Curwensville High School arrived in town yesterday to visit for a few days. Mr. Zetter has been taking a summer school course at Middleville, Pa.

Mrs. George Eury, of Bellefonte is visiting at the home of Mr. and Mrs. S. W. Karstetter on Filbert street. Charlie Cole, of Clarkburg, W. Va. has been visiting his mother, Mrs. John Cole for several weeks.

Mrs. Elizabeth Balentine of New Cumberland, W. Va. is visiting at the home of Rev. and Mrs. B. H. Conley.

Mrs. Joseph Riffe and daughter, Mr. Pauline Riffe of Jersey Shore arrived at Clearfield last evening where Mrs. Riffe will go into the Clearfield Hospital to have her tonsils removed.

Mr. and Mrs. C. W. Appoby, of Tarentum, Pa. are visiting Mrs. Appoby's parents, Mr. and Mrs. B. H. Conley.

Mr. Lewis Feib was a Clearfield visitor yesterday.

Mrs. Mary Cole has returned to her home on South Side after visiting with friends in Philadelphia.

Mr. and Mrs. Fred Robinson and son Robert left yesterday for Chattanooga, N. Y. where they will spend a week enjoying the fine entertainment, bathing, etc.

Mr. John Snyder is spending a few days at her home in Clearfield.

Mrs. H. F. Smith has been visiting her sister, Mrs. Frank Smith, of Altoona for several weeks.

BIGLER

Mrs. George W. Michaels of Kermore is visiting relatives in Bigler.

Ray Fulton of Pittsburgh visited his sister, Mrs. Ross Eshelman last week.

Mr. and Mrs. Arthur Lansberry and son of Akron, O., are visiting relatives here.

Mrs. Eva Williams and grand daughter Eva Peters have returned from a week's visit with relatives at Curwensville.

Mildred, Isabella and Raymond Edmunds are visiting relatives in New York state.

C. A. Walker and family and Maud and Mary Miller spent Thursday with relatives at Yarnell, Center county.

Mr. and Mrs. James Taylor and family of Osceola Mills spent Sunday with the latter's father, Joseph Peters.

Mrs. J. M. Baker and two daughters, Orla and Bessie, of Woodland, spent Thursday at the home of Samuel Stevens.

Mrs. Mary Rougeux and daughters Irene and Catherine spent the week end at the home of Mrs. Harvey Legal in Clearfield.

Mrs. W. A. Muir of Curwensville and Mrs. E. M. Lines of Morgantown, W. Va., spent Sunday with the former's daughter, Mrs. Melvin Kyles.

Mrs. G. B. Thompson and Mr. Les Waple and Lethia Thompson and Catherine Cusley spent Thursday at the home of Mrs. Ed Bryan at Gardner.

Mrs. Kate Michaels of Bigler and Mr. G. W. Michaels of Kermore visited the former's son, Verdon Michaels and family, at Kylesville last week.

Rev. and Mrs. J. C. Moses are returning over the arrival of a boy baby which came to their home Sunday morning.

Mrs. Jonathan Ashworth and daughter Elizabeth, Mrs. James Lutz and son Joe of Osceola Mills,

spent Thursday with their sisters, Mrs. Lloyd Stevens and Mrs. Wayne Taylor.

A festival was held at the Clearfield High School on Monday evening for the benefit of the band. The band was the main attraction and the proceeds of the festival will be used to purchase new uniforms for the band.

HORSE SHOT SCORES

The pitching on Monday and Tuesday night cleared up several more teams in the tournament. The Monday scores are:

Games	1	2	3	4	5
Brunner and Hughes	9	9	15		
Cowdick and Shaw	21	21	21		
Hughes and Munter	21	21	21		
Healey and Sandy	11	0	0		
O'Donnell and Hixon	21	21	18	10	10
Flegal and Flegal	7	1	21	21	21
Phine and Wilkin	1	1	1		
Smith and Reed	21	21	21		

The Flegals and the Munter Ship winners settled their little affairs last night—a close game. Flegal and Flegal 21, 21, 12, 13. Smith and Reed 17, 21, 1, 21. Thursday and Friday will determine the Champion team of the pitching both nights will be interesting.

Overheard at a Concert
"I hate ducks!" And I sides I think it's cowardly for two persons to attack one piece of music! Besto Transcript.

WILL TAKE LEGION BAND TO DUBOIS

The Clearfield Fire Department, accompanied by the American Legion Band, will go to Dubois on a home on the Mt. Joy road at 2 o'clock Friday morning over the B. & P. road. The band will play at 8 o'clock tomorrow morning. The band will be made in Mt. Joy Cemetery.

FUNERAL OF M. J. OWENS

The funeral of the late Morris J. Owens will be held from 10 to 11 o'clock Friday afternoon at 2 o'clock Thursday afternoon. The funeral will be held in Mt. Joy Cemetery.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

HOW THEY DO IT

SPENDING your days addressing to the world at large the question: "How do they do it?" is not going to bring you any information.

You will see in your travels the banker, the railroad president, the painter, the author all respected, all useful, all getting a great deal out of a life that they have, each in their own way, made easier for others.

You will read, perhaps, that this man started on a farm, that the other began as an office boy, that the railroad president once wiped engines on the line which he now rules.

And if you are normal the question "How do they do it?" will occur to you very frequently.

For these men will look much like other men; they will talk like other men. They will have the same interest in baseball scores and the outcome of a big prize fight.

And it will be difficult for you to understand just what it was that placed them in the high positions they occupy, and kept them there.

The answer to your question is fortunately not inaccessible. You can find out how they do it, if you try.

Nearly all of them have written, or will write, exactly how they did it, or if they do not they will tell others who will put it on paper for you to see.

And you will be very much surprised to discover that in most cases the one thing that did it was application and industry—in other words hard work.

Geniuses are men apart. They don't know how they do it, and they can't tell.

But successful business men and lawyers and doctors are not geniuses. They are merely men with good natural ability, and enough energy to keep working till they get what they are after.

Study and read their biographies wherever you find them. They will answer for you a very important question. And if they can help you just a little toward exerting more energy and cherishing a little higher purpose, the time you spend in reading about them will be paid for at the rate of many thousand dollars an hour.

(Copyright by John Blake.)

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

A BUSINESS PERSON'S HAND

IN THE hand of a good man or woman of business the fingers are well opened, when held naturally, this showing versatility and self-confidence. The mount of Mars, which lies below the mount of Mercury (the latter is at the base of the little finger), should be strong and well-marked, because this indicates courage and willingness to take risks when necessary.

An exceptionally favorable sign for a man or woman of business is a tripod, or three-pronged division of the line of fate at its end. The line of fate runs up the center of the hand. This sign shows great success in business. If the finger of Mercury is unusually long, in proportion to the other fingers, it shows acquisitiveness and care of money, and is therefore a good sign for a business person. If there is a short line running upward from the line of life to or toward the finger of Jupiter, which is the index or first finger, it is a sign of ambition that is or will be gratified. Last, look in the center of the palm for a triangle that is well formed. This indicates forethought and intuition, valuable qualities in business.

Softer Than Rose Leaves.

According to a Greek writer, of feminine families in ancient Greece sometimes slept on beds of sponge.

KIDDIES SIX

By Will M. Maupin

TODAY

DON'T waste time in sighing
For old days;
Don't waste time in crying
For old ways.
Better days than yesterdays
Leave no time for sorrow;
On them better fix your gaze—
Today and tomorrow.

Don't waste time in fretting
For lost hours;
Don't waste time regretting
The lost flowers.
Better hours are growing
Than memory can borrow;
Sweeter flowers are blowing
Today and tomorrow.

Don't waste time repining
O'er bad days;
Don't waste time declining
The good ways.
Smile and look around you,
And new courage borrow;
Better days surround you—
Today and tomorrow.
(Copyright by Will M. Maupin.)

Mother's Cook Book

It is well to scrutinize your own shortcomings before calling attention to those of your neighbors. "You have a hole in your tail," said the slave to the needle.

VARIATIONS OF STANDARD SALAD DRESSINGS.

MAYONNAISE dressing should be thick like whipped cream, and remain so for a long time, if kept in a cool place. Olive oil is by far the most tasty to use in making mayonnaise, but corn oil makes a very good substitute, and as far as appearance is concerned, is equally as good.

To vary mayonnaise add to three-fourths of a cupful two tablespoonfuls of tomato puree; this is tomato cooked down, until very thick and put through a sieve.

Piquante mayonnaise—add two tablespoonfuls of chopped olives and pickles.

Cream mayonnaise is prepared by adding three or four tablespoonfuls of whipped cream to three-fourths of a cupful of mayonnaise.

Chutney mayonnaise—add one and one-half tablespoonfuls of chutney.

Connely mayonnaise—add one-half cupful of cold boiled rice.

Thousand island dressing—to one cupful of mayonnaise add one-half cupful of salad oil, very slowly; one tablespoonful of tarragon vinegar, one-fourth teaspoonful of paprika, one tablespoonful of chopped chives, one tablespoonful of chopped parsley, one tablespoonful of green peppers, chopped; and one-third of a cupful of chili sauce.

Russian dressing—to one cupful of mayonnaise add three tablespoonfuls of chili sauce, two tablespoonfuls of pimento cut in small pieces, one tablespoonful of tarragon vinegar, one teaspoonful of chopped chives and three-fourths of a tablespoonful of Worcestershire sauce.

Fig Filling.

Cook one cupful of chopped figs in one-half cupful of water, the juice of a lemon and when cool stir in powdered sugar until thick. Use on layer cake.

Lemon Filling.

Boil together five minutes one cupful of sugar, one-half teaspoonful of melted butter, one-half cupful of water and the juice of two lemons. Add two well-beaten eggs. Beat well; cool before using.

United States Roads Outdo World.

The highways of this nation total more miles than nearly all the rest of the world's put together—2,500,000.

Let Us Figure It Out For You

We have a man here that does little else than be of service to anyone who is desirous of having something printed. Just one instance cropped up the other day. A client came in and wanted cards printed to announce some new stock that had arrived in his plant. After giving the matter some thought our man suggested that he print the message on blotters rather than on cards as the blotter would carry more advertising individuality and have a longer advertising life than a card, no matter how expensive he would make the card. The client accepted the suggestion stating that he was pleased with that kind of service when he went to his printer

Better Business Printing

The chap that makes these suggestions has had a wide experience. He has worked in offices where forms were the thing—he can tell you where a slight change might possibly improve your form. He has had years of retail store experience—can tell you about your store forms. Has made a study of advertising in all its branches and can possibly give you some hints on changes that will make your envelope stuffers, your direct advertising, or what-not stronger in its advertising appeal. There is always something new to be learned about the printing business and a close study of several of the best trade journals on printing is keeping this man informed all the time of things that are new.

May We Have the Pleasure of Helping You With Your Printing?

PROGRESS Business Printing Department

OPERATORS HOLDING BACK

Continued from Page One

Penna and we will sign no agreement made in that conference."

Ed Stewart, former president of District 11, United Mine Workers of America, said Indiana operators and miners would sign working agreements at once.

Calls It Unimportant

Chicago, Aug. 15.—The settlement reached at Cleveland was declared to be unimportant because of the small tonnage involved, in a statement issued today by F. C. Honnold, secretary of the Illinois Coal operators' Association. The statement said that the Cleveland settlement will offer a strong incentive for the less financially secure companies to sign up with the unions, but reaffirmed the intention of the Illinois operators to "stand pat for an arbitration basis agreement."

Another Pessimist

Kansas City, Aug. 15.—The strike settlement between coal operators and miners in conference at Cleveland today, will in no way settle the nationwide strike, nor does it bind the operators in any of the states not represented at Cleveland, Harry N. Taylor, president of the Southwestern Interstate Coal Operators' Association declared in a statement today.

Conference Delayed

Philadelphia, Aug. 15.—The conference of anthracite coal operators and representatives of the mine workers, set for tomorrow, has been postponed until 8 p. m. Thursday, at the request of John I. Lewis, president of the United Mine Workers.

In a telegram this afternoon to Samuel B. Warriner, head of the operators' negotiating committee, requesting the postponement Mr. Lewis said that the presence of the union officials was required in Cleveland in connection with the soft coal settlement.

Two Ill. Districts Meet
St. Louis, Aug. 15.—The coal opera-

tors of the fifth and ninth Illinois districts will meet in a joint district wage conference with Frank Farrington, head of the Illinois union miners and the executive board at Chicago next Friday. The meeting was made possible later this afternoon when W. K. Kavanaugh, head of the operators' association of the two districts, accepted an invitation from Mr. Farrington suggesting the joint wage conference.

May Revoke Lever Law

Washington, D. C., Aug. 16.—Revival of the entire profiteering provisions of the war time Lever law is under consideration in Administration circles to check soaring coal prices. With the settlement of the coal strike impending the Government has no restraining power over the prices of fuel. Secretary of Commerce Hoover pointed out here today that the arrangement he had with the coal operators was merely for the duration of the strike and that with the scores of mines resuming operation a new method will have to be found to prevent higher coal prices.

Southwest Will Meet

Kansas City, Mo., Aug. 16.—Hope of extending peace into the coal fields of the southwest was expressed when a conference was arranged for next Tuesday.

Say Indiana Will Sign

Washington, D. C., Aug. 16.—Indiana operators will sign the Cleveland conference agreement for ending the coal strike, American Federation of Labor agents at Indianapolis reported today. Encouraging reports to the effect that operators in this field would sign the agreement was received.

Cleveland, Aug. 14.—The bituminous coal strike cracked here late today. Cutting of coal started in the first Ohio mines to sign. Reopening of mines in many states is expected tomorrow.

A dozen or more district wage scale committees of the United Mine Workers of America sat in unimportant session in all parts of the assembly hall of the Hollenden Hotel to-

day, signing up operators, who immediately telegraphed mine managers to start work in many parts of the country and outside the so-called central competitive field.

In a half hour 5,000,000 tonnage in the Pittsburgh or Western Pennsylvania district—about 12 per cent. of the total output there—was signed up across a table by Acting President P. T. Fagan. Secretary-Treasurer William Hargest and International Board Member John O'Leary, for District No. 5, United Mine Workers of America, with operators who appeared, permitting work to be resumed tomorrow, if mines are ready by over 6,000 of the 45,800 striking miners in that district, and at the following operations:

Consumers' Fuel and Bertha Coal companies (John H. Jones' interests)

employing 2,500 men in six mines in Washington county.

Johnetta Brick Company (Jones' interests,) 350 men at Johnetta, Armstrong county.

Oak Hill Coal Company, employing 450 men in mines at Avella and Langloeth, Washington county.

Ford Collieries Company, 1,500 men, Curtis Nos. 1, 2 and 3 mines, Curtisville, Allegheny county.

Valley Camp Coal Company, 1,600 men, two mines near Parkersburg, Westmoreland county, and one in Soudan, Washington county.

The F. E. Welsh Contracting Co., strip mine, employing 50 men, at Spears, Washington county.

BROKEN FLANGE ON FREIGHT CAR PUTS TRAIN OFF TRACK

Four cars of a freight train which passed through Clearfield on the Pennsy last evening about 6:30 were wrecked at the Potts Run siding at Rustic, near Curwensville. A broken flange on one of the cars was responsible for the accident. No one was injured, but the 6:23 passenger train was held up behind the wreck. When the 6:45 train from Tyrone arrived here the passengers from up the line were transferred to it and it made the trip back to Tyrone from here.

Collins' Latest
**Gossip For
Tonight's Tea
Table**
The hike from the East End play-ground finally came off yesterday afternoon. Counting Miss Stewart, some twenty-four children set out for Fishgills (?) about ten o'clock, carrying lunch baskets and bathing suits. What with periods of the deep and periods of wandering freight trains, a thoroughly "good time was had by all".
J. W. Marsden received the sad news that his brother, Harry Marsden, had died at the Johnstown hospital, following an operation.
William Wink, one of Pike township's most progressive farmers, was a Clearfield visitor today.

**BAD ACCIDENT IN SUBWAY
AVERTED BY COOL FIREMAN**
New York, N. Y., Aug. 16.—Women were prevented from leaping through windows of a speeding subway train, the rear car of which was on fire, by the prompt action of William P. Hogan, a fireman who was on his way to work. Memories of the recent panic in a subway train gave the passengers on the train a bad scare, but no rush started and Hogan led the train crew in quickly extinguishing the blaze.
Voices Preserved for Centuries.
Photograph records of the voices of leading men are being made on copper discs, said to last 10,000 years, and stored in the Prussian State library.

PRESENTING
LITTLE MISS GAGE

who wants other little girls to call to see the Little Miss Gage Line of Hats for Fall.
Little Miss Gage wants to meet the little girls of Clearfield to tell them something about the line of hats for girls from four to fourteen which have been named after her.
Doubtless your mother or big sister has worn a Gage Hat, and if you will ask her she will tell you about its good qualities. If neither of them has as yet, you may be the one to set them a good example.
In any event, come over to Leonardson's store and ask to see the Little Miss Gage Line. You will find hats of duvetyn, plush and velvet, some for dress up and some for play. All of them have an adjustable lining, so that they may be made to stay on your head, no matter how hard the wind blows or how fast you run.
THE CONTEST
Some little girl in Clearfield (perhaps it is you) is going to have a chance to win a Little Miss Gage Hat as a prize for excellence in coloring the pictures in a very pretty fairy story called "Little Miss Gage in Fairyland."
Ask Leonardson's for the particulars.
A. W. LEONARDSON CO.

Air Resistance In Tunnels.
When a train goes through a tunnel the resistance of the air is an important factor, experiments having demonstrated that it measures 1.96 pounds per ton of train weight in the Simpson tunnel, as against only .88 pounds in the open air, a difference of over 10 per cent. This is when the train is running at 37 miles an hour in the direction of the ventilating air current; when running in the opposite direction the resistance increases to 20.46 pounds.

Thought He Might Be Curious.
One day when riding in the country with their parents the children were obliged to sit in the back of the buggy. It was quite comfortable if they sat still, but a true small for much turning about, so there were numerous cautions to be careful not to fall out. When little brother was observed gazing intently down the road his sister questioned him thus: "What you looking back for; to see if you fell out?"

May Be a Hairless Race.
The hair growth on various parts of the body is regulated to perform a specific purpose. When we tamper with this growth for centuries we develop new forms. Perhaps this is why baldness is a modern affliction, entirely unknown in primeval periods. Eventually the human race will probably be denuded of all hair.

Annie Laurie.
This famous song was written by Annie Laurie's lover, William Douglas of England, Scotland, about the year 1705. She was the daughter of Sir Robert Laurie of Maxwellton, Dumfriesshire, first baronet of Maxwellton. Douglas' courtship was unsuccessful, for in the year 1709 Annie Laurie married a Mr. Ferguson of Craigdarroch. The tune of the song was composed by Lady John Scott.

Topography of New Guinea.
The coastal regions of New Guinea—practically the only parts known—are typical tropical lands and, as might be expected, are not particularly healthful. The mountains of the interior reach a considerable height, one peak being more than 500 feet higher than Mount Whitney, the highest peak in the United States proper.

Irreverent Mix.
"In my time," declared grandma, "girls were more modest." "I know," said the flippant girl. "It was a bad once. We may get back to it."—Life.

THE WOMAN OF POISE,
Once a rarity is now to be observed and admired upon every hand. In deed, no other woman can flourish long in the midst of this modern complicated life. In the home, in business, in social life, the woman who is serene and confident wins, while the nervous, flustered individual wastes her talents and gets nowhere. Of course, poise is dependent mainly upon sound health and steady nerves. If you feel that you are being kept back in this way why not turn to that great woman's remedy, Lydia E. Pinkham's Vegetable Compound, which was manufactured from a thorough understanding of the nervous system of women?

A COMPLETE DRUG STORE
Do you ever stop to think what it means to have such a complete drug store at your service as this one? Here you have such a wide variety of stocks to select from that you may come in here and satisfy a vast number of wants that you did not expect to.
Drop in some time, if you aren't in that habit, and see what a wide variety of things we have
Stewart's Drug Store
Lefter Store

Record Mastodon Tusk.
The largest mastodon tusk ever discovered was found by workmen 40 feet below the surface of the earth in a gravel pit at Chelmsford—weight 75 pounds; seven feet from tip to tip.

Insects That Resist Freezing.
Insects which spend most of their lives in a torpid or semi-torpid condition are seldom injured and never killed by being frozen. There are numerous instances of travelers in mountain regions having found beetles and butterflies above the snow line which were stiff, frozen and apparently dead. When carried down to the warmer air in the valley, however, they revived in a very short time.

The latest photograph of Michael Collins, just received in America shows him as commander of the Irish Free States forces.

OPERATORS HOLDING BACK ACCEPTANCE OF LEWIS' SCALE

Pittsb'g Producers Late
Today Refused to At-
tend Conference With

OTHERS GIVE VIEWS

Pittsburgh Producers Refuse to Meet
Union Officials.

Pittsburgh, Pa., Aug. 16.—The sub-scale committee of the Pittsburgh Coal Producers Association today again refused to meet with representatives of the miners' union here Friday to negotiate a settlement of the strike on the basis of the Cleveland conference. The Pittsburgh producers in which the Pittsburgh Coal Company is the dominating factor controls 60 per cent. of the tonnage in Western Pennsylvania.

Secretary Davis Optimistic.

Washington, D. C., Aug. 16.—Scores of coal operators who did not attend the Cleveland peace meeting have signified their intention of joining in the strike settlement, Secretary of Labor Davis announced today. Davis estimated that operators who signed the agreement represented an output of 2,000,000 tons of coal weekly. Representatives of the Labor Department informed him that the producers of another 2,000,000 tons weekly who were not represented at the conference will adhere to the agreement reached there within a few days. An anthracite settlement is imminent, Davis stated.

Cleveland, Ohio, Aug. 16.—John L. Lewis, president of the United Mine Workers, is expected to issue instructions to district mine officials to place the agreement reached here yesterday before operators of their districts at once.

If the operators sign the agreement as Lewis predicts the bituminous strike will be ended in 75% of the soft coal districts.

Following the reporting of the agreement Lewis issued a statement in which he heralded the pact as a complete victory for the miners. Lewis said "I esteem this termination of the conference as being especially gratifying, not only to the mine workers, who have emerged from this great industrial conflict with signal honors, but to the American people as well. The settlement is an honorable one to all concerned."

Associations Meet

Pittsburgh, Pa., Aug. 16.—Peace or continued warfare in the soft coal fields of Western Pennsylvania hinged today on the outcome of meetings of two operators' associations controlling 80% tonnage. Scale committees of the Pittsburgh Coal Producers Association and the Freeport, Thick, Vein Operators' Association meet here today to take action on an invitation from District No. 5, United Mine Workers, to negotiate a settlement on the basis of the agreement reached at the Cleveland conference.

Phil. Penna Defiant

Terre Haute, Ind., Aug. 16.—"The action of the Cleveland conference in reaching agreements is of no consequence to the Indiana Bituminous Coal Operators' Association," said Phil H. Penna, secretary of the association when apprised of the developments there. "Our association was not represented," continued Mr.

Text of Agreement Made at Cleveland

Cleveland, Aug. 16. The text of the agreement made by the United Mine Workers' representatives and some of the coal operators at the Cleveland conference follows:

First.—All mine of operators represented in this joint conference which are now on strike, are to be opened immediately upon the execution of supplementary contracts extending to March 31, 1923, the terms, provisions and conditions of the contracts affecting such mines as they respectively existed on March 31, 1922, except as to renewal or continuation clauses in such contracts.

Second.—The participants in this conference agree to send, and this conference invites, the bituminous coal operators of the United States to send representative delegates, from coal-producing districts, or from substantial groups of operators, which delegates shall as far as possible be representatives of the bituminous coal industry of the United States, such delegates to assemble in joint conference in Cleveland, Ohio, October 2, 1922.

This joint conference shall appoint a committee of equal numbers of representative operators and miners, which committee shall formulate a method to be followed by the bituminous coal industry in the negotiation of wage scale agreements to become effective April 1, 1923, and the method so formulated shall be by the committee be reported to the joint conference to be held January 3, 1923, as hereinafter provided.

Third.—The joint conference convening October 2 shall further select a committee of inquiry, the members of which shall be of commanding public reputation for character and ability, and whose personnel shall be approved by the President of the United States. The duty of this committee shall be to develop all of the pertinent facts in regard to the industry for the benefit alike of the public, the operator, and the mine workers.

Such investigation shall include every phase of the industry deemed material by the committee of inquiry, and such committee shall be furnished with all information desired and aided in every manner possible by the operators and miners alike.

In the event such joint conference shall fail to agree upon the members of such committee of inquiry by October 10, 1922, it shall petition the President of the United States to appoint the members thereof in his discretion, and in the event of a vacancy the President is requested to fill same by appointment. The cost of such committee of inquiry shall be paid by the industry, one-half by the operators participating in the joint conference and one-half by the United Mine Workers of America.

Such committee, after developing all the facts, shall make such recommendations as it may deem

proper and advisable, and shall, so far as possible, embody these recommendations in a report to be submitted to the joint conference to be convened January 3, 1923, as hereinafter provided.

In order to reach a final and proper determination of the controversy in the bituminous coal industry, for the benefit of the miners and operators and the public as well, the following principal points are presented for consideration by the committee of inquiry:

Opportunity for Saving.

(A) The wage rate in any district shall, as far as reasonable, be properly competitive within the mining industry and shall at the same time be fully compensatory to the miners, being sufficient to afford not only a living wage, but also to allow reasonable opportunity for accumulating savings.

(B) The encouragement of a proper spirit of obligation and responsibility on the part of all parties towards contractual obligations and the establishment of proper machinery, both local and national, for prompt determination and settlement of any points of dispute in any local, State or district contract without resorting to strike or lockout.

(C) The determination of a proper policy to encourage efficiency of operation not only on the part of mine management in the mechanical operation of the mines, but also on the part of individual miners in the performance of their daily work.

Fourth.—The participants of this conference agree to send, and this convention invites, the bituminous coal operators of the United States to send representative delegates from coal-producing districts, or from substantial groups of coal operators, which delegates shall, as far as possible, be representatives of the bituminous coal industry of the United States, such delegates, to meet in joint conference January 3, 1923, at such place as may be designated by the joint conference held October 2, 1922. The joint conference shall receive the report from the committee appointed in conformity with paragraph two, and shall finally determine the method to be followed by the participants in the conference in the negotiation of wage scale agreements to become effective April 1, 1923.

To the end that the new wage scale agreements to be effective April 1, 1923, shall be determined upon as speedily as practicable, and further strikes be thereby averted, the method of negotiating wage agreements which shall be determined upon by said joint conference shall provide that such machinery as is created by it to develop a new wage scale agreement shall commence to function not later than January 8, 1923. The wage scale agreement concluded by such machinery shall be effective April 1, 1923, and shall be in effect during such time as it may determine.

WATKINS LAUDS NEW AGREEMENT AS NEW ERA IN INDUSTRY

Virtual Acceptance Of
Harding's Plan, Says
Man Who Served On
Hard Coal Commiss'n.

LOOKS FOR PEACE

T. H. Watkins, president of the Pennsylvania Coal and Coke Corporation and a member of the memorable Roosevelt Anthracite Strike Commission, who has a wide experience in industrial affairs, issued the following statement at the close of the Cleveland conference.

"As a result of conciliatory efforts inaugurated by President Harding at the Washington conference, a constructive agreement has at last come out of the Cleveland meeting. The central competitive field conference, to which we attribute most of our past difficulties, was definitely broken up and abandoned yesterday and the meetings were thrown open to operators and miners from every district in the United States.

The method of renewing contracts expiring March 31, 1923, is left to a joint committee of miners and operators which will report on January 3, 1923. All parties have engaged themselves to exert every effort toward the amicable negotiation of equitable wage agreements next spring.

The outstanding feature of the new agreement is the incorporation of a law providing for the selection of a commission of inquiry composed of prominent and unbiased citizens instructed to make a most exhaustive investigation of the whole industry and to lay down recommendations upon which future voluntary agreements can be negotiated on sound economic lines between the operators and the miners.

For the first time in the coal industry important labor leaders and employers have joined together in a crisis and voluntarily set up the machinery, not only for a resumption of work, but for the establishment of a public tribunal before whom they engage themselves to appear with all the facts of the industrial activities of both parties. The recommendations of this commission are to be the guide for necessary steps toward a permanent solution as well as for future agreements negotiated without interference or compulsion except as both sides must how to the powerful opinion of a well-informed public.

The document means that reason has been restored to the coal industry. The exercise of force, whether through strikes, compulsory awards or arbitrary procedure, has no place in the program upon which we have agreed. Compulsory arbitration has failed too often in recent industrial crises, to offer any hope of effectiveness, in a situation which requires a basic solution, not merely a reconciliation of immediate difference.

We believe that the door has been opened to a new era in the coal industry in which the consuming public as well as those engaged in producing coal will have full access to the essential facts of the industry and an influence in guiding it into more peaceful and stable channels."

MOTORIST FOUND SHOT THRU CHEST NEAR PITTSBURGH

Pittsburgh, Pa., Aug. 16.—Shot in the chest while sitting at the wheel of his machine, George Schuler, aged 32, of Carnegie, was found early today on the Steubenville pike by a fireman on the Panhandle road. Robbery was not the motive for the crime as a sum of money was found in Schuler's pockets.

TEN CHILDREN AND TWO ADULTS BURN TO DEATH IN ORPHANS' HOME FIRE

SHAWBRIDGE, Quebec, August 16.—Ten children and a man and a woman were burned to death early today in a fire which totally destroyed the Jewish Boys' Home here. The dead are Thomas Leganet, caretaker, his wife, Jean Leganet, aged seven, Marie, aged fourteen, and eight orphans ranging in age from six to sixteen. Collapse of the building where the victims were helplessly trapped threw the vicinity into darkness by destroying a local lighting plant, thus adding to the horror. Only the fact that a majority of the orphans slept out of doors prevented their perishing in the holocaust. Twelve bodies were recovered but some of them were so badly charred they could not be identified today.

Hay's Not Concerned In Hart's Affair

Both Bill Hart and Will Hays have denied that the latter attempted to effect a reconciliation between Hart and his bride of less than a year, Winifred Westover. She says she will soon bring suit for divorce alleging cruelty. Hart denies her charges.

AUTO VICTIM DIES AT RIDGWAY; BROUGHT HOME FOR BURIAL

Elma Williams, the little 9-year old daughter of Mrs. Nina Williams, of South Fourth street, who was seriously injured in an auto accident near Ridgway on Saturday evening last, passed away at the Ridgway Hospital last evening at 5 o'clock.

Little Elma, with her mother, her brother Leonard, half brothers Ray and Ed Gallagher and the latter's wife left Clearfield Saturday in the Gallagher's Nash car to go to Ridgway. While ascending a steep hill on the Boot Jack road near Ridgway they caught up to a Ford car also going toward Ridgway. Ed Gallagher was driving and sounded his horn as notice to the driver he was about to go around him. The Ford started to turn out to let the car pass but the driver stalled his engine and stopped his Ford diagonally across the road. Mr. Gallagher turned his car sharply to avoid a collision and slid slowly into a ditch at the side of the road, the car toppling over.

Little Elma had been sitting on her mother's lap but when the others extricated themselves from the wreck they found the little girl under the car. A hinge on one of the doors had struck her in the side just under the arm and crushed her ribs. When she was taken out she walked some distance up into a field along the road and then collapsed.

She was taken to the Ridgway Hospital where everything possible was done for her, but it was of no avail. A couple of her ribs had been crushed, the broken bones penetrating her lungs. She became unconscious on Sunday and remained in that condition until the final summons came at 5 o'clock last evening.

VARDAMAN, WILSON FOE, HAS A SLIGHT LEAD FOR SENATE

Jackson, Miss., Aug. 16.—Former Senator James A. Vardaman, bitter foe of Woodrow Wilson, today was leading in the Mississippi Senatorial primary by fewer than 200 votes on returns from 71 out of 82 counties. Backers of Hurbert G. Stephens, running on a pro-Wilson platform, were confident he would nose out Vardaman when complete returns are in, but it was admitted that a "run off" primary probably would be necessary because of the State law requiring that a nominee must get a majority of the votes.

Miss Belle Kearney, the woman candidate in the Senatorial race, polled about 15,000 votes.

Germany Deposits Five Million Marks, Saying It Is All She Can Pay

Berlin, Germany, Aug. 16.—We have paid all we can, Chancellor Wirth stated today in announcing that 5,000,000 gold marks had been deposited in the Bank of England as a payment on their debt. Marks today slumped to 4700 for a pound sterling, or over 1000 for the dollar.

MAJOR REED WILL BE U. S. SENATOR TODAY

Washington, D. C., Aug. 16.—Major David A. Reed, who is to be sworn in as the new Senator from Pennsylvania today to succeed the late William E. Crow, called at the White House this morning and left his card. He was accompanied by Senator George Wharton Pepper and Governor William C. Sproul. They did not see the President as he was not in.

Bluing Steel.
To blue steel, mix finely powdered Prussian blue with rather thin shellac, then gently heat and apply the varnish.

DISTRICT NO. TWO OPERATORS WILL MEET TOMORROW

General Meeting of Both
Associations Called at
The Dimeling To Take
Action On Agreement.

MEET AT TWO P. M.

The fate of District No. 2 is to be decided tomorrow afternoon when members of both the Association of Bituminous Coal Operators and the Central Pennsylvania Coal Producers Association will hold a joint meeting here to decide on a course of action on the wage scale made at Cleveland. The local associations were not represented at Cleveland and little is known today as to their attitude beyond the individual expressions made with considerable frequency. There is a likelihood that the District No. 2 operators will vote to re-open their mines, but it is quite apparent that a great number of the operators are not favorable to doing so.

So far as can be learned, the only large operator in the District No. 2 field who has signed up on the new scale is the Pennsylvania Coal & Coke Corporation with mines at Winburne, Patton, Arcadia, Crescen and a dozen or so other coal fields in Indiana and Cambria counties. The Progress learns that the Clearfield Bituminous Coal Corporation also is planning to start up within a day or so and there is a report current that the Allegheny River Coal Company, a subsidiary of the Pittsburgh and Shawmut Railway, has signed up. None of the mines in this district are yet in operation as Mr. Brophy has not yet returned to this field with the agreement forms and the local union officers are without authority to direct a return to work until Mr. Brophy returns.

Prior to the general meeting of the operators here tomorrow, which will be held at the Dimeling hotel at two o'clock, there will be an executive meeting at eleven o'clock.

COUNTER SUIT IS FILED AGAINST E. T. CHANDLER, SPORT

Atlanta, Ga., Aug. 16.—Mrs. Sara Gillespie Byfield today filed suit for \$100,000 against Ealter T. Chandler, sportsman and capitalist stating that he caused her personal humiliation in an attack upon her on board the steamer Berrangalia enroute to France. The suit followed an action brought by Chandler against Mrs. Byfield's husband, Clyde Byfield, charging blackmail.

Describing the incidents following the champagne supper aboard the Berrangalia on the night of July 10th, the petitioner stated: "Finally the petitioner, Mrs. Byfield, and her husband left the party and went to petitioner's stateroom to retire for the night. After getting there, petitioner's husband stated that they had left the party somewhat abruptly and in a way which might be construed as rudely, so he said he would go back and stay with the party for a while. When petitioner's husband had left her, she was preparing to sleep. A short time after petitioner's husband left her, Chandler opened the door, drew the bed clothing off her, disheveled her night clothes and grabbed her in his arms. Petitioner screamed and continued to scream until her husband rushed into the room and immediately engaged in a desperate fight with Chandler. Following this scene, Mrs. Byfield became ill and has remained ill from that day to the present, the statement alleges.

Odell Houser, political scribe on The Philadelphia Ledger, is spending some time here, the guest of Frank Short, son of John F. Short.

BROTHERHOODS AND CONGRESS TO TAKE TRY AT RAIL FIGHT

Washington, D. C., Aug. 16.—Skeptical of an early settlement of the rail strike President Harding today prepared to place the critical transportation situation before Congress in a special message tomorrow. The President expected to spend most of the day in conference with Congressional leaders and other advisors. He realized that the situation is charged with political dynamite and is seeking advice from all quarters before putting to the test any further strike measures. There can be no settlement until one side or the other is prepared to make radical concessions.

Pessimism regarding a settlement was found in the flat rejection of Mr. Harding's proposal by the leaders of the 400,000 men who represent the rail industry. The case is then turned to work.

RAIL NEWS

New York, Aug. 15.—Railroad executives and union spokesmen will meet Thursday in a new conference in an effort to bring an end to the railroad strike.

This was assured today when T. DeWitt Cuyler, chairman of the Association of Railway Executives, accepted an invitation for such a conference telegraphed by Warren S. Stone, grand chief of the Brotherhood of Locomotive Engineers.

The conference will be held in New York. Details now are being arranged.

Stone is in Washington, where, endeavoring to find a solution of the differences between the railroads and their shopmen. Members of Stone's organization, as well as those of other brotherhoods, are not on strike.

But there have been sporadic strikes of engineers and other brotherhood men, especially in the West, because of the presence of armed guards and defective equipment.

R. S. Binkerd, assistant to Cuyler, who made the announcement, said the

Woman's Part

We have not yet sufficiently studied the part of women, or claimed their help. They have a power of spiritual vision which men have not. It was not an accident that a woman was the herald of the Resurrection. She may be yet again, in a fuller spiritual sense. To women great ideals are natural. They have an intuition of the whole of things. They have capacities for training and education which we have not yet used.—Bishop Westcott.

Free Public Schools in Old Rome.

By the Fourth century in the Roman empire there was a system of free elementary schools for the children of all workers; a system of free secondary schools for the better pupils, and a number of special schools (like universities) which also could be reached without payment by the poor. The municipalities everywhere were compelled to maintain these.—J. McCabe in "The Evolution of Civilization."

Caught at Last!

Ross Ponselle, operatio prima donna, has been trying for three years to catch a square-tailed, speckled trout at Carlestown, Pa. She got him this summer. He weighs nine pounds, three ounces.

ODDS AND ENDS AND THINGS

By J. D. C.

The following extracts from an article from the pen of H. B. Douglass, a former Clearfielder, concerning the history and achievements of the Clearfield Bituminous Coal Corporation, published in the New York Central Lines magazine, should prove of interest generally:

Comparatively few employees of the New York Central Lines are familiar with the extensive coal holdings and activities of the Clearfield Bituminous Coal Corporation, and doubtless, fewer still realize the great economic value of this, its subsidiary to the parent railroad company. The New York Central is indeed fortunate, not only in the possession of so vast a field of high-grade coal, but also in the fact that the greater portion of it is located on its own line of railroad.

Mines Opened in 1860.

The Clearfield Bituminous Coal Corporation had its inception in the old McIntyre Coal Co., operating at McIntyre in the northeast corner of Lycoming county, Pennsylvania. C. J. Langdon of Elmira, N. Y., was president of this company and George H. Platt, superintendent. The mines were opened in the 60's, the latter map bearing the date of 1873. We know little of this company. Tradition informs us, however, that the coal was three feet in thickness, of good quality, and found a ready market in New York and Canada. Today we look in vain for the village of McIntyre. An ancient cemetery is all that remains, for it was one of those ephemeral towns that follow the pick and disappear with the coal.

The McIntyre Coal Company's property was nearing exhaustion in the early '80s, and President Langdon cast about for additional acreage. Associated with him in this new enterprise were such men as W. K. Vanderbilt and Cornelius Vanderbilt of New York; Joseph M. Gayman and John G. Reading of Philadelphia; General George J. Magee of Watkins, New York; S. R. Peale of Lock Haven, Pa., and William A. Wallace of Clearfield, Pa., all of whom appear as directors in the new company formed. This company was known as the Clearfield Bituminous Coal Company, and received its charter and letters patent December 27, 1882.

In 1882 the company acquired 22,150 acres of land in Rush and Snowshoe townships, Centre County, and Cooper township, Clearfield county, Pennsylvania. In 1883 the coal was opened and the village of Peale, named for S. R. Peale, laid out. Located in a wooded section of great natural beauty, at the confluence of Moravian Run, a small trout stream, and Mochannon Creek, Peale was considered in its day, and undoubtedly is, a model mining town.

The western terminus of the Beech Creek Railroad, of South Western Railroad was, at this time, at Snow that in the beginning all material had to be hauled in by team from that point. It was not until 1884 that the railroad was extended to Vinuet, two miles west of Peale and rail shipments began. In 1883 the Clearfield Company purchased 11,720 acres of coal in Jordan, Ferguson, Knox and Greenwood townships, Clearfield county. In the year following, the coal was opened and the town of Gazzam established.

Pioneers Worked Well.

The development of a large coal property, viewed from any angle is a serious affair. In no other field of endeavor are initial mistakes so costly, and so hard to correct; and so it is most refreshing to record here that the pioneers of the Clearfield Bituminous Coal Corporation did their work faithfully and well.

There was one stockholder of record, however, who, it is safe to assume, did not take the mining game seriously. He was none other than Samuel L. Clemens (Mark Twain), a brother-in-law of President Langdon, and owned all of six shares. "Old Timers"—a few of them are still with this Corporation—delight to tell of a week this great man spent at Peale; and of how he put in his days prone upon the office floor, his back against an overturned chair, smoking and reading. It is easy to visualize the gentle humorist in his favorite reading posture; and one can readily believe that his active mind enjoyed to the full whatever of human interest went on about him, and stored it away for future "copy."

But all this is ancient history. Gazzam has disappeared; the picturesque village of Peale is but a memory; and the trout leap no more in the contaminated waters of Moravian Run. The men who inspired and engineered the project have long since passed on, and their passing indeed mark the end of an era. Machinery, in its application to the mining industry, was

coming into its own, and in its progress gradually crowding out the old skilled pick miner. And with these latter departed whatever romance there was in the mining of bituminous coal.

In 1886 the Clearfield Company was taken over by a new organization chartered under the name "Clearfield Bituminous Coal Corporation." In the same year the New York Central & Hudson River Railroad Co. leased the Beech Creek, Clearfield and South Western Railroad and operated with the title "Beech Creek Railroad, N. Y. C. & H. R. R. Co., Lessee." In 1899 the Central took over the Fall Brook Railroad and the Beech Creek Railroad and consolidated them into the "Pennsylvania Division." It is of special interest to note that President F. E. Harriman of the Clearfield Bituminous Coal Corporation, was an official of the old Beech Creek Railroad, and that he was appointed, at this time, Division Coal Agent of the Pennsylvania Division, with headquarters in New York. He was subsequently made Coal Traffic Manager of the New York Central and resigned this position in 1917 to become an attaché of the office of President A. H. Smith, his task being the coordination of the railroad's coal properties.

About this time the Clearfield Corporation ceased its commercial activities, and became what it is today, strictly a railroad fuel proposition. Aside from a small portion of the tonnage consumed in the Corporation's power plants, and sold locally to employees for domestic use, the entire output goes to the New York Central Railroad for supply.

Large Area Supplied.

The New York Central executives early saw the advantages to be derived from coal land ownership, and wisely encouraged in their subsidiary a rapid and healthy expansion. From 1902 to 1916 the Clearfield Corporation had acquired 127,123 additional acres in Cambria and Indiana counties, bringing the total acreage up to 161,293.

It is the policy of the Corporation to sell or lease such territory as it cannot economically exploit and in this derive a revenue to pay in part the carrying charges on the entire property. This policy has resulted in the sale of approximately 11,000 acres, and a lease of 49,330 acres, leaving about 100,000 acres to be developed, sold or leased as conditions warrant.

The Clearfield Corporation is developing and mining five fields, viz., Cooper in Clearfield county; West Branch in Cambria county; and Rosister, Clymer, and Purchase Line, in Indiana county, Pa. Cooper Colliery is producing Lower Kittanning coal; the four mines at Commodore in the Purchase Line field are operating on the Upper Freeport seam, while Barr Slope and Sample Run collieries in the Clymer field and the West Branch operation are mining the Lower Freeport. These coals all possess high fuel values. The Cooper coal is especially notable, not only as a strong steamer, but as a fuel so low in volatile matter as to be practically smokeless. It is in great demand for use in yards and stationary plants located in cities.

These mines are all located on the

FARM FOR SALE

I offer the following farm and its contents for sale at a real bargain to a quick buyer. Just the farm for any man to make a good investment and start in farming.

Farm known as the James Northern farm, located in Lawrence township near O'Shanter, Pa. Five minute walk to New York Central station.

Acres: 85.

50 acres cleared in good state of cultivation.
25 acres in woodland estimated as follows:
30,000 spruce,
10,000 feet hemlock,
9,000 feet hemlock,
16,000 feet of pine,
10,000 feet of hardwood.
200 Railroad ties.

This farm is underlaid with three seams of coal, namely B, C, and G Prime good workable seams.

Good eight-room house practically new. Good barn forty feet square. Two good work horses that weigh 1,200 each. Two good milk cows. Four head of young cattle. Seventy-five chickens, two hogs, wagon and harness, cow horse, plough, drop reaper, mows and mowing machine, and various other implements too numerous to mention. Twelve tons of timothy and clover hay in the barn. Two hundred and twenty dozen of oats, five acres of good corn. Five and one-half of good buckwheat. Three acres of good wheat, one and one-half acres of potatoes.

Good peach orchard on the farm. Good apple orchard on the farm. Good spring water on the farm. Running water in the house. House is illuminated by acetylene gas.

For particulars communicate by letter or by phone, Room 6, Penn. Public Service Building, both phones: H & C, 492, Bell, 194, Clearfield, Pa.

Isaac H. Robinson

8:15-tf-ch

Pennsylvania Division, New York Central Railroad; produce annually a million and a half net tons; and have a developed capacity of approximately two million tons. The fields are being developed along scientific lines and the mines worked in accord with the best mining practice, having always in mind conservation and by central plants located at Rosister and Clymer, is used throughout for hauling, mining, pumping, ventilating and lighting.

Today's Wise Word.

"The soul shall have society of its own rank."—Lafcadio Hearn

ATTENDING FIREMEN'S CONVENTION

A delegation of about fifteen of the members of Columbia Fire Company of Oseola passed through Clearfield this morning in a handsome little motor driven hose car en route for the District Firemen's Convention at DuBois.

British Metropolis Ancient City.

London is at least as old as the Roman conquest of Britain (43 A. D.), and there was probably an old British town in the same place before the Romans made an important city of it.

HAWK RUN GIRL BADLY BURNED

Miss Priscilla Stevens, 23 years old, a daughter of Josiah Stevens, of Hawk Run, is at the Cottage State Hospital suffering from severe burns. She was raking up the fire in the stove when a brand came into contact with her dress, setting it afire. One side of her body was most painfully burned.

His Only Fear.

In an English court—"This man is a terror. The only thing he is afraid of is his coffee's color."

Look for the Atlantic tank in front of good garages and oil stations.

"ATLANTIC Medium is the finest medium-bodied motor oil you can buy"

Atlantic Medium contains only those crude-oil hydrocarbons peculiarly suited to internal combustion engine lubrication. Its resistance to change in "body" at widely varying temperatures gives it the advantage of much heavier oils, while still retaining the free-flowing mobility of "medium."

It leaves little carbon in the combustion chamber; nor does it gum valves or foul spark plugs. After use, even though diluted by the absorption of fuel vapors and contaminated with foreign matter in the crankcase, Atlantic Medium can be restored to its original condition. This shows that the character of the oil is not appreciably changed by use.

Put Atlantic Medium in your crankcase and see for yourself how completely this oil lets a man take his mind off his motor and concentrate it on the pleasure of motoring.

ATLANTIC MOTOR OIL

Keeps Upkeep Down

Note these New Prices on U.S. Tires

ON July 29, 1922, the lowest prices ever quoted on U.S. Passenger Car Tires went into effect—Royal Cords included. These new prices should give confidence to dealers and car owners that no lower basis of quality tire prices will prevail.

Bear in mind that these prices apply to the most complete line of quality tires in the world. Remember, too—as you read the following table—that U. S. quality has been positively maintained.

SIZES	Royal Cord	Nobby	FABRIC	Usco	Plain
30 x 3 CL	112.55	114.40	99.75	\$9.25

THE GREAT UNIT OF POWER

Former Senator Cole, of California, nearing his hundredth birthday, has come to much wisdom with his years. Among other things he has decided that "we really never are headed for perdition, no matter how numerous are the signs in that direction." As a man who has lived while the nation has grown from 3,000,000 to more than 110,000,000, he should know and, as he points out, it has never gone to perdition yet.

One of his convictions, allied to this opinion, is that the family is the unit in the political system of the country. While he suggests thereby a slight distrust of woman's suffrage, in a broader way it reflects Mr. Cole's basic confidence in the duty and ability of the American home to control the national destiny.

This was true when only 3,000,000 persons lived in the United States. It is true today. Beside the limitless power of the American home the strutting and mouthing of little politicians is silly. Yet, simply by disuse, that great power of the American home has been snatched up by a few men in almost every community who use it for the exploitation of selfishness. The power still exists, is reclaimable whenever the American home decides to do so, but for the present, during recent years it is "borrowed" and used while the owner's back is turned.

It is the recovery and use of this power by the American home that is the greatest task facing this nation today. No other problem compares with it. It is the practice of the theory enunciated in the constitution. It is the proof, always needing restatement as generations change, that democracy is successful and that it is possible for a nation to govern itself intelligently by common judgment.

High patriotism today would make national representation the supreme topic of discussion in every American home. What burdens the home most? Taxation. What is the most important job facing the government? To get out of debt and stay out of debt, thus reducing taxes. Who can effect that? The national representatives, if—if they are big, capable patriotic servants of the public.

The nation has run the gamut of political emotions these last few years. It has seen the result of its negligence in political scandals in confiscatory taxation, in unnecessary strikes, in profiteering, and in many other ways. Methods have been changed to meet new conditions. But one thing remains unchanged, and that is the power of the American home to write its own history, decree its own taxes, and command the forces, all lesser than itself, which contribute to its liberty and prosperity.

FOR LESS WILL POWER

It is becoming more difficult as time goes on to read the text of a periodical without meeting the self-improvement salesman. He's there every month in the front of the book with a scheme to make your lungs as capacious as a blacksmith's bellows and your memory as enduring as that popularly ascribed to the elephant. He seeks to plant in you a desire for biceps as powerful as Mr. Zbyszko's and a will as unyielding as Gibraltar.

Especially is he anxious about your will power. He insists if you say every morning, "I will have a million dollars before I die," that eventually that prospect will materialize.

This may be entirely true, and a strong will may be capable of scaling any height. But much depends on the task set for the will. It might be as well in the end if there were courses arranged for deflation of a lot of the will power in the world. A movement for weaker wills would stop, among other things, all future wars for it would do away with a vast amount of selfishness. A will as inflexible as Everest is not particularly precious if it is exercised in trampling on the rest of humanity to reach a seat in the sun.

Lincoln did not repeat the "I will" formula periodically. Historians seem to agree that he groped along in a consciousness that he was an instrument of God.

The picture of the downy sophomore clenching his fists before the mirror and parroting the mystic ritual is engaging. But perhaps it would be better in the beginning if he substituted faith for gymnastics in will power. Faith moves men forward with no loud gritting of teeth and digging of nails into the palms. The will developer is apt to be an annoyance to himself and a nuisance to his friends. Faith annoys none, and it is a lot more comfortable than looking intense and cutting a neighbor's throat.

LIQUID ASSETS

The aim of the County National's management has always been to keep its assets, in so far as possible, in liquid shape, so that every customer entitled to credit can be accommodated on request.

At the time of the latest statement, the bank had cash assets, (cash on hand or deposited with other banks and demand loans) of \$1,064,623.83.

For many years the County National Bank has not found it necessary to refuse a request for a loan on account of lack of available funds.

Your account is invited on the assurance that you may obtain such loans as your financial condition and your account with the bank warrant.

ONLY WOMAN MAJOR IN ARMY

Julia C. Stinson, Dean of School of Nursing, Served as Chief Nurse of Red Cross.

The most intense of the army nurse corps, and dean of the Army School of Nursing, is the only woman major in the United States army. Maj. Julia C. Stinson served as chief nurse of the American Red Cross in Paris and later as director of the American expeditionary forces nursing service, with 10,000 nurses, under her control during the World War, before becoming superintendent of the army nurse corps and head of the school of nursing.

Major Stinson was born in Worcester, Mass., and graduated from Vassar when barely twenty years of age. She first went overseas as chief nurse of the St. Louis unit, base hospital No. 21. She holds numerous awards and citations for her services during the war.

One of the major's most recent experiences was the honor of christening the army transport Claumont. "General Pershing was there," Major Stinson said in speaking of the event, "and I spilled champagne all over the general's best uniform when I broke the bottle over the bow."

FEW BUCKS NOW IN U. S. ARMY

Number of Trained Doughboys Has Been Reduced, Bringing Total to Not More Than 20,000.

Doughboys—just plain black privates of infantry—are becoming almost as scarce in the regular army as shavetails were some time ago. Every time there is a reduction in the size of the army, the number of buck privates is very perceptibly cut down. At the present time, it is said that there are not more than 20,000 plain, unspecialized "bucks" in the ranks of the United States army. There are only 47,837 men in all branches of the foot regiments while there were more than 53,000 enlisted men in the infantry when the war started in April, 1917.

Impending additional reductions in the size of the army will show a further drop in the number of privates, officers say, and leave the infantry only a framework of highly trained specialists with just a few humble bayonet-wielding bucks here and there to give a sketchy suggestion of a wartime force.

This framework of specialists will be maintained, the War department declares, so that in an emergency the army may be able to quickly expand filling in the vacant ranks with raw recruits who, with a few weeks' training, will make our fighting forces a highly trained machine.

PREFERS TO MARCH AS 'BUCK'

Brig. Gen. William V. McMaken, Ohio, Has Served His Country for Forty Years.

William V. McMaken of Toledo, O., who was a brigadier general in the service to which he gave 40 years of his life, says that he prefers now to march as a "buck" in the rear rank at patriotic and memorial demonstrations since his military career is over. But this modesty sometimes causes him a little embarrassment. During the American Legion parade at the national convention in Cleveland, in 1920, when Mr. McMaken marched in the ranks, he received the "bawling out" of his life from an erstwhile hard-boiled sergeant who noticed that the former brigadier general had failed to "dress right."

Mr. McMaken was a brigadier commander in the Thirty-seventh division during the World War.

Carrying On With the American Legion

A memorial to the marines who were once students of the University of Minnesota has been unveiled on the university campus.

An entire island in the Maumee river, 20 miles from Toledo, O., has been bought by a Toledo Post of the American Legion to be used as a vacation resort.

Athletic and playground equipment for seven playgrounds in Buck's county, Pennsylvania, has been presented to each of as many communities by the American Legion.

A special troop of boy scouts who could not pay their entrance fees into the scout organization were organized and given their uniforms and equipment by the American Legion at Ottumwa, Ia.

The \$900,000 remaining unexpended following the payment of the New Jersey state loans to former service men may be used by the American Legion to provide hospital accommodations for incapacitated ex-soldiers.

LIVE STOCK

PREVENT LOSS IN SHIPPING

Partitions in Stock Cars Separating Large Animals From Small Ones is Good Idea.

(Prepared by the United States Department of Agriculture)

A little time and labor, possibly a little money, expended in building a strong partition to separate the big animals from the small ones in a mixed carload of live stock frequently saves the shipper from a serious loss on the consignment, say specialists of the bureau of markets, United States Department of Agriculture. The smaller animals, such as hogs, lambs, goats and sheep are always in danger of injury from the larger animals, and this is especially true when the car is overcrowded.

Crippled animals mean a loss to the shipper, for they bring prices considerably below the regular market price for sound stock. Dead animals bring still less—in the case of hogs only about 50 to 75 cents per hundred pounds for waste. There is always the danger, too, of the small stock becoming bruised, through being jostled and kicked by the larger ones. Bruises make a carcass less valuable, as the meat inspectors in the slaughterhouses cut out all bruised spots. Meat thus mutilated is sold as cheaper grades, the depreciation depending upon how much cutting was necessary. The buyers in the stock yards know this, of course, and, consequently, pay less for animals that

Goats Cleaning Out Weed Patch.

show bruises or seem likely to have suffered in this way.

Buyers are afraid of bruised stock, and for this reason are suspicious of small animals arriving at the stock yards in a mixed carload where the larger animals are not partitioned off. Such injuries are difficult to detect in the live animal but when small stock, such as calves and lambs, arrive in a badly soiled condition buyers usually suspect they have been trampled and bruised by larger animals, and as a rule the buyers play safe by paying less money for such stock.

MORE BROOD SOWS ON FARMS

Increase of 1,237,000 Over Year Ago Is Seen, Due Largely to Big Stock of Corn.

There were 12,424,000 breeding sows on farms April 1, the United States Department of Agriculture estimates. This is 1,237,000 animals more than on the same date in 1921 and represents an increase of 11.1 per cent.

The large corn crop last year and the unusually large farm stocks of corn are given as the explanation of the large increase in breeding sows this spring. Corn was worth more as pork than as corn, and hogs were needed to eat the corn.

The number of hogs is quickly responsive to the general economic situation, the department points out. In April 1918, the number of breeding sows was 9.5 per cent more than on the same date in 1917, due to high hog prices as a result of war conditions. The figures on April, 1920, show a decline of 10 per cent for the year ended on that date. The reason for this was that the price of corn was relatively too high to encourage the feeding of hogs.

FINE FORAGE CROPS FOR PIGS

Rape Is Rich in Protein, While Alfalfa Will Carry More Animals Per Acre.

Rape is rich in protein, and is almost equal to alfalfa as a forage crop for pigs. The chief advantage to alfalfa lies in the fact that it will generally carry more pigs per acre, and does not need to be reseeded each year.

Make Land Pay More.

Purebred live stock on every farm would go far toward making high priced land pay 6 per cent net on its value.

Have Purebred Females Too.

Of course the purebred sire is the first step, but there's no good argument against purebred females in live-stock improvement.

Take Care of Animals.

Take good care of the animals now and they will take care of you later.

ALL OVER BUT THE SHOUTING!

STEEL HELMETS

ROSS & WOODS

News of : Our Neighbors CURWENSVILLE

Gilbert Landy of Mahaffey was a Curwensville visitor yesterday.

Mr and Mrs C A Rorabaugh returned to their home yesterday after visiting their daughter Mrs Harry Wilbur of Youngtown, Ohio, for several weeks.

P A Zetter, of Youngsville, Pa, a teacher in the Curwensville High School arrived in town yesterday to visit for a few days. Mr Zetter has been taking a summer school course at Middleville, Pa.

Mrs George Eury, of Bellefonte is visiting at the home of Mr and Mrs S W Karstetter on Filbert street. Charlie Cole, of Clarksburg W Va has been visiting his mother, Mrs John Cole for several weeks.

Mrs Elizabeth Balentine of New Cumberland W Va is visiting at the home of Rev and Mrs B H Conley.

Mrs Joseph Riffe and daughter, Mr Pauline Riffe of Jersey Shore arrived at Clearfield last evening where Mrs Riffe will go into the Clearfield Hospital to have her tonsils removed.

Mr and Mrs C W Appoby, of Tarentum Pa are visiting Mrs Appoby's parents, Mr and Mrs R H Conley.

Mr Lewis Feib was a Clearfield visitor yesterday.

Mrs Mary Cole has returned to her home on South Side after visiting with friends in Philadelphia.

Mr and Mrs Fred Robinson and son Robert left yesterday for Chattanooga N Y where they will spend a week enjoying the fine entertainment, bathing, etc.

Mr John Snyder is spending a few days at her home in Clearfield.

Mrs H F Smith has been visiting her sister Mrs Frank Smith, of Altoona for several weeks.

BIGLER

Mrs George W Michaels of Kermore is visiting relatives in Bigler.

Ray Fulton of Pittsburgh visited his sister, Mrs Ross Eshelman last week.

Mr and Mrs Arthur Lansberry and son of Akron, O, are visiting relatives here.

Mrs Eva Williams and grand daughter Eva Peters have returned from a week's visit with relatives at Curwensville.

Mildred, Isabella and Raymond Edmunds are visiting relatives in New York state.

C A Walker and family and Maud and Mary Miller spent Thursday with relatives at Yarnell, Center county.

Mr and Mrs James Taylor and family of Osceola Mills spent Sunday with the latter's father, Joseph Peters.

Mrs J M Baker and two daughters, Orla and Bernice, of Woodland, spent Thursday at the home of Samuel Stevens.

Mrs Mary Rougeux and daughters Irene and Catherine spent the week end at the home of Mrs Harvey Legal in Clearfield.

Mrs W A Muir of Curwensville and Mrs E M Lines of Morgantown W Va, spent Sunday with the former's daughter, Mrs Melvin Kyles.

Mrs G B Thompson and Mr Les Waple and Lethia Thompson and Catherine Cusley spent Thursday at the home of Mrs Ed Bryan at Gardner.

Mrs Kate Michaels of Bigler and Mr G W Michaels of Kermore visited the former's son, Verdon Michaels and family, at Kiertown last week.

Rev and Mrs J C Moses are returning over the arrival of a boy baby which came to their home Sunday morning.

Mrs Jonathan Ashworth and daughter Elizabeth, Mrs James Ely and son Joe of Osceola Mills,

spent Thursday with their sisters, Mrs Lloyd Stevens and Mrs Wayne Taylor.

A festival was held at the Clearfield Fair grounds on Sunday evening for the benefit of the Clearfield Hospital. The Clearfield band furnished the music for the occasion which was greatly enjoyed by all. The sum of \$100.00 was realized.

HORSE SHOT SCORES

The pitching on Monday and Tuesday night cleared up several more teams in the tournament. The Monday scores are:

Games	1	2	3	4	5
Brunner and Hughes	9	9	15		
Cowdick and Shaw	21	21	21		
Hughes and Munter	21	21	21		
Healey and Sandy	11	0	0		
O'Donnell & Hoxm	21	21	18	10	10
Flegal and Flegal	7	1	21	21	21
Phine and Wilkin	1	1	1		
Smith and Reed	21	21	21		

The Flegals and the Munter Ship winners settled their little affairs last night—a close game naturally. Flegal and Flegal 21 7 12 15. Smith and Reed 17 21 1 21.

Thursday and Friday will determine the Champion team of the pitching both nights will be interesting.

Overheard at a Concert
"I hate ducks!" And I sides I think it's cowardly for two persons to attack one piece of music! Besto Transcript.

WILL TAKE LEGION BAND TO DUBOIS

The Clearfield Fire Department, accompanied by the American Legion Band, will go to Dubois on a home on the Mt Joy road at 2 o'clock Friday morning over the B & P road. The band will play at 8 o'clock tomorrow morning. The band will be made in Mt Joy Cemetery.

FUNERAL OF M. J. OWENS

The funeral of the late Morris J. Owens will be held from 10 to 11 o'clock Friday afternoon. The funeral will be held in Mt Joy Cemetery.

SCHOOL DAYS

Uncommon Sense

By JOHN BLAKE

HOW THEY DO IT

SPENDING your days addressing to the world at large the question: "How do they do it?" is not going to bring you any information.

You will see in your travels the banker, the railroad president, the painter, the author all respected, all useful, all getting a great deal out of a life that they have, each in their own way, made easier for others.

You will read, perhaps, that this man started on a farm, that the other began as an office boy, that the railroad president once wiped engines on the line which he now rules.

And if you are normal the question "How do they do it?" will occur to you very frequently.

For these men will look much like other men; they will talk like other men. They will have the same interest in baseball scores and the outcome of a big prize fight.

And it will be difficult for you to understand just what it was that placed them in the high positions they occupy, and kept them there.

The answer to your question is fortunately not inaccessible. You can find out how they do it, if you try.

Nearly all of them have written, or will write, exactly how they did it, or if they do not they will tell others who will put it on paper for you to see.

And you will be very much surprised to discover that in most cases the one thing that did it was application and industry—in other words hard work.

Geniuses are men apart. They don't know how they do it, and they can't tell.

But successful business men and lawyers and doctors are not geniuses. They are merely men with good natural ability, and enough energy to keep working till they get what they are after.

Study and read their biographies wherever you find them. They will answer for you a very important question. And if they can help you just a little toward exerting more energy and cherishing a little higher purpose, the time you spend in reading about them will be paid for at the rate of many thousand dollars an hour.

(Copyright by John Blake.)

YOUR HAND

How to Read Your Characteristics and Tendencies—the Capabilities or Weaknesses That Make for Success or Failure as Shown in Your Palm

A BUSINESS PERSON'S HAND

IN THE hand of a good man or woman of business the fingers are well opened, when held naturally, this showing versatility and self-confidence. The mount of Mars, which lies below the mount of Mercury (the latter is at the base of the little finger), should be strong and well-marked, because this indicates courage and willingness to take risks when necessary.

An exceptionally favorable sign for a man or woman of business is a tripod, or three-pronged division of the line of fate at its end. The line of fate runs up the center of the hand. This sign shows great success in business. If the finger of Mercury is unusually long, in proportion to the other fingers, it shows acquisitiveness and care of money, and is therefore a good sign for a business person. If there is a short line running upward from the line of life to or toward the finger of Jupiter, which is the index or first finger, it is a sign of ambition that is or will be gratified. Last, look in the center of the palm for a triangle that is well formed. This indicates forethought and intuition, valuable qualities in business.

Softer Than Rose Leaves.

According to a Greek writer, of feminine families in ancient Greece sometimes slept on beds of sponge.

KIDDIES SIX

By Will M. Maupin

TODAY

DON'T waste time in sighing
For old days;
Don't waste time in crying
For old ways.
Better days than yesterdays
Leave no time for sorrow;
On them better fix your gaze—
Today and tomorrow.

Don't waste time in fretting
For lost hours;
Don't waste time regretting
The lost flowers.
Better hours are growing
Than memory can borrow;
Sweeter flowers are blowing
Today and tomorrow.

Don't waste time repining
O'er bad days;
Don't waste time declining
The good ways.
Smile and look around you,
And new courage borrow;
Better days surround you—
Today and tomorrow.
(Copyright by Will M. Maupin.)

Mother's Cook Book

It is well to scrutinize your own shortcomings before calling attention to those of your neighbors. "You have a hole in your tail," said the slave to the needle.

VARIATIONS OF STANDARD SALAD DRESSINGS.

MAYONNAISE dressing should be thick like whipped cream, and remain so for a long time, if kept in a cool place. Olive oil is by far the most tasty to use in making mayonnaise, but corn oil makes a very good substitute, and as far as appearance is concerned, is equally as good.

To vary mayonnaise add to three-fourths of a cupful two tablespoonfuls of tomato puree; this is tomato cooked down, until very thick and put through a sieve.

Piquante mayonnaise—add two tablespoonfuls of chopped olives and pickles.

Cream mayonnaise is prepared by adding three or four tablespoonfuls of whipped cream to three-fourths of a cupful of mayonnaise.

Chutney mayonnaise—add one and one-half tablespoonfuls of chutney.

Connely mayonnaise—add one-half cupful of cold boiled rice.

Thousand isle dressing—to one cupful of mayonnaise add one-half cupful of salad oil, very slowly; one tablespoonful of tarragon vinegar, one-fourth teaspoonful of paprika, one tablespoonful of chopped chives, one tablespoonful of chopped parsley, one tablespoonful of green peppers, chopped; and one-third of a cupful of chili sauce.

Russian dressing—to one cupful of mayonnaise add three tablespoonfuls of chili sauce, two tablespoonfuls of pimento cut in small pieces, one tablespoonful of tarragon vinegar, one teaspoonful of chopped chives and three-fourths of a tablespoonful of Worcestershire sauce.

Fig Filling.

Cook one cupful of chopped figs in one-half cupful of water, the juice of a lemon and when cool stir in powdered sugar until thick. Use on layer cake.

Lemon Filling.

Boil together five minutes one cupful of sugar, one-half teaspoonful of melted butter, one-half cupful of water and the juice of two lemons. Add two well-beaten eggs. Beat well; cool before using.

Let Us Figure It Out For You

We have a man here that does little else than be of service to anyone who is desirous of having something printed. Just one instance cropped up the other day. A client came in and wanted cards printed to announce some new stock that had arrived in his plant. After giving the matter some thought our man suggested that he print the message on blotters rather than on cards as the blotter would carry more advertising individuality and have a longer advertising life than a card, no matter how expensive he would make the card. The client accepted the suggestion stating that he was pleased with that kind of service when he went to his printer

Better Business Printing

The chap that makes these suggestions has had a wide experience. He has worked in offices where forms were the thing—he can tell you where a slight change might possibly improve your form. He has had years of retail store experience—can tell you about your store forms. Has made a study of advertising in all its branches and can possibly give you some hints on changes that will make your envelope stuffers, your direct advertising, or what-not stronger in its advertising appeal. There is always something new to be learned about the printing business and a close study of several of the best trade journals on printing is keeping this man informed all the time of things that are new.

May We Have the Pleasure of Helping You With Your Printing?

PROGRESS Business Printing Department

OPERATORS HOLDING BACK

Continued from Page One

Penna and we will sign no agreement made in that conference."

Ed Stewart, former president of District 11, United Mine Workers of America, said Indiana operators and miners would sign working agreements at once.

Calls It Unimportant

Chicago, Aug. 15.—The settlement reached at Cleveland was declared to be unimportant because of the small tonnage involved, in a statement issued today by F. C. Honnold, secretary of the Illinois Coal operators' Association. The statement said that the Cleveland settlement will offer a strong incentive for the less financially secure companies to sign up with the unions, but reaffirmed the intention of the Illinois operators to "stand pat for an arbitration basis agreement."

Another Pessimist

Kansas City, Aug. 15.—The strike settlement between coal operators and miners in conference at Cleveland today, will in no way settle the nationwide strike, not does it bind the operators in any of the states not represented at Cleveland, Harry N. Taylor, president of the Southwestern Interstate Coal Operators' Association declared in a statement today.

Conference Delayed

Philadelphia, Aug. 15.—The conference of anthracite coal operators and representatives of the mine workers, set for tomorrow, has been postponed until 8 p. m. Thursday, at the request of John I. Lewis, president of the United Mine Workers.

In a telegram this afternoon to Samuel B. Warriner, head of the operators' negotiating committee, requesting the postponement Mr. Lewis said that the presence of the union officials was required in Cleveland in connection with the soft coal settlement.

Two Ill. Districts Meet
St. Louis, Aug. 15.—The coal opera-

tors of the fifth and ninth Illinois districts will meet in a joint district wage conference with Frank Farrington, head of the Illinois union miners and the executive board at Chicago next Friday. The meeting was made possible later this afternoon when W. K. Kavanaugh, head of the operators' association of the two districts, accepted an invitation from Mr. Farrington suggesting the joint wage conference.

May Revoke Lever Law

Washington, D. C., Aug. 16.—Revival of the entire profiteering provisions of the war time Lever law is under consideration in Administration circles to check soaring coal prices. With the settlement of the coal strike impending the Government has no restraining power over the prices of fuel. Secretary of Commerce Hoover pointed out here today that the arrangement he had with the coal operators was merely for the duration of the strike and that with the scores of mines resuming operation a new method will have to be found to prevent higher coal prices.

Southwest Will Meet

Kansas City, Mo., Aug. 16.—Hope of extending peace into the coal fields of the southwest was expressed when a conference was arranged for next Tuesday.

Say Indiana Will Sign

Washington, D. C., Aug. 16.—Indiana operators will sign the Cleveland conference agreement for ending the coal strike, American Federation of Labor agents at Indianapolis reported today. Encouraging reports to the effect that operators in this field would sign the agreement was received.

Cleveland, Aug. 14.—The bituminous coal strike cracked here late today. Cutting of coal started in the first Ohio mines to sign. Reopening of mines in many states is expected tomorrow.

A dozen or more district wage scale committees of the United Mine Workers of America sat in unimportant session in all parts of the assembly hall of the Hollenden Hotel to-

day, signing up operators, who immediately telegraphed mine managers to start work in many parts of the country and outside the so-called central competitive field.

In a half hour 5,000,000 tonnage in the Pittsburgh or Western Pennsylvania district—about 12 per cent. of the total output there—was signed up across a table by Acting President P. T. Fagan. Secretary-Treasurer William Hargest and International Board Member John O'Leary, for District No. 5, United Mine Workers of America, with operators who appeared, permitting work to be resumed tomorrow, if mines are ready by over 6,000 of the 45,800 striking miners in that district, and at the following operations:

Consumers' Fuel and Bertha Coal companies (John H. Jones' interests)

employing 2,500 men in six mines in Washington county.

Johnetta Brick Company (Jones' interests,) 350 men at Johnetta, Armstrong county.

Oak Hill Coal Company, employing 450 men in mines at Avella and Langloeth, Washington county.

Ford Collieries Company, 1,500 men, Curtis Nos. 1, 2 and 3 mines, Curtisville, Allegheny county.

Valley Camp Coal Company, 1,600 men, two mines near Parkersburg, Westmoreland county, and one in Soudan, Washington county.

The F. E. Welsh Contracting Co., strip mine, employing 50 men, at Spears, Washington county.

The biggest of all sea birds is the albatross.

BROKEN FLANGE ON FREIGHT CAR PUTS TRAIN OFF TRACK

Four cars of a freight train which passed through Clearfield on the Pennsy last evening about 6:30 were wrecked at the Potts Run siding at Rustic, near Curwensville. A broken flange on one of the cars was responsible for the accident. No one was injured, but the 6:23 passenger train was held up behind the wreck. When the 6:45 train from Tyrone arrived here the passengers from up the line were transferred to it and it made the trip back to Tyrone from here.

BEAUTIFUL GIRL IN BATHING SUIT LOST IN THE OHIO RIVER

Covington, Ky., Aug. 16.—The body of a beautiful girl with black, bobbed hair, clad only in a bathing suit, was found in the Ohio River beneath the C. & O. Railroad bridge here today. The girl was about nineteen years old. Coroner D. W. Stephens began an investigation.

Men is not a giraffe by any means, but when a pretty girl trips along he can twist his neck in a dozen different ways.—Oakland Tribune.

The Strangest Pact a Woman Ever Made With a Man For One Year of Happiness!

JEALOUSY drove her from the protection of a home. NECESSITY forced her to pose as an artist's model because her beauty was highly manifest. DESPERATION inspired her in making the most unique bid for happiness ever conceived by a woman—and the question is:

COULD YOU BLAME HER?

Faith Sublime.

We wonder if there ever was a woman whose faith in her husband was so absolute that when she found the small sheets of a letter in a feminine handwriting in his wastebasket she didn't try to piece them together but dismissed the matter from her mind with the reflection that of course it was a business communication. Collins' Latest
**Gossip For
Tonight's Tea
Table**
The hike from the East End play-ground finally came off yesterday afternoon. Counting Miss Stewart, some twenty-four children set out for Fishgills (?) about ten o'clock, carrying lunch baskets and bathing suits. What with periods of the deep and periods of wandering freight trains, a thoroughly "good time was had by all."
J. W. Marsden received the sad news that his brother, Harry Marsden, had died at the Johnstown hospital, following an operation.
William Wink, one of Pike township's most progressive farmers, was a Clearfield visitor today.

**BAD ACCIDENT IN SUBWAY
AVERTED BY COOL FIREMAN**
New York, N. Y., Aug. 16.—Women were prevented from leaping through windows of a speeding subway train, the rear car of which was on fire, by the prompt action of William P. Hogan, a fireman who was on his way to work. Memories of the recent panic in a subway train gave the passengers on the train a bad scare, but no rush started and Hogan led the train crew in quickly extinguishing the blaze.
Voices Preserved for Centuries.
Photograph records of the voices of leading men are being made on copper discs, said to last 10,000 years, and stored in the Prussian State library.

PRESENTING
LITTLE MISS GAGE

who wants other little girls to call to see the Little Miss Gage Line of Hats for Fall.
Little Miss Gage wants to meet the little girls of Clearfield to tell them something about the line of hats for girls from four to fourteen which have been named after her.
Doubtless your mother or big sister has worn a Gage Hat, and if you will ask her she will tell you about its good qualities. If neither of them has as yet, you may be the one to set them a good example.
In any event, come over to Leonardson's store and ask to see the Little Miss Gage Line. You will find hats of duvetyn, plush and velvet, some for dress up and some for play. All of them have an adjustable lining, so that they may be made to stay on your head, no matter how hard the wind blows or how fast you run.
THE CONTEST
Some little girl in Clearfield (perhaps it is you) is going to have a chance to win a Little Miss Gage Hat as a prize for excellence in coloring the pictures in a very pretty fairy story called "Little Miss Gage in Fairyland."
Ask Leonardson's for the particulars.
A. W. LEONARDSON CO.

Air Resistance In Tunnels.
When a train goes through a tunnel the resistance of the air is an important factor, experiments having demonstrated that it measures 1.96 pounds per ton of train weight in the Simpson tunnel, as against only .88 pounds in the open air, a difference of over 10 per cent. This is when the train is running at 37 miles an hour in the direction of the ventilating air current; when running in the opposite direction the resistance increases to 20.46 pounds.

Record Mastodon Tusk.
The largest mastodon tusk ever discovered was found by workmen 40 feet below the surface of the earth in a gravel pit at Chelmsford—weight 75 pounds; seven feet from tip to tip.

Insects That Resist Freezing.
Insects which spend most of their lives in a torpid or semi-torpid condition are seldom injured and never killed by being frozen. There are numerous instances of travelers in mountain regions having found beetles and butterflies above the snow line which were stiff, frozen and apparently dead. When carried down to the warmer air in the valley, however, they revived in a very short time.

The latest photograph of Michael Collins, just received in America shows him as commander of the Irish Free States forces.

First Be Sure, Then Act.
Advise well before you begin and when you have maturely considered, then act with promptitude.

Thought He Might Be Curious.
One day when riding in the country with their parents the children were obliged to sit in the back of the buggy. It was quite comfortable if they sat still, but a true small for much turning about, so there were numerous cautions to be careful not to fall out. When little brother was observed gazing intently down the road his sister questioned him thus: "What you looking back for; to see if you fell out?"

May Be a Hairless Race.
The hair growth on various parts of the body is regulated to perform a specific purpose. When we tamper with this growth for centuries we develop new forms. Perhaps this is why baldness is a modern affliction, entirely unknown in primeval periods. Eventually the human race will probably be denuded of all hair.

Annie Laurie.
This famous song was written by Annie Laurie's lover, William Douglas of England, Scotland, about the year 1705. She was the daughter of Sir Robert Laurie of Maxwellton, Dumfriesshire, first baronet of Maxwellton. Douglas' courtship was unsuccessful, for in the year 1709 Annie Laurie married a Mr. Ferguson of Craigdarroch. The tune of the song was composed by Lady John Scott.

Topography of New Guinea.
The coastal regions of New Guinea—practically the only parts known—are typical tropical lands and, as might be expected, are not particularly healthful. The mountains of the interior reach a considerable height, one peak being more than 500 feet higher than Mount Whitney, the highest peak in the United States proper.

Irreverent Mix.
"In my time," declared grandma, "girls were more modest." "I know," said the flippant girl. "It was a bad once. We may get back to it."—Life.

THE WOMAN OF POISE,
Once a rarity is now to be observed and admired upon every hand. In deed, no other woman can flourish long in the midst of this modern complicated life. In the home, in business, in social life, the woman who is serene and confident wins, while the nervous, flustered individual wastes her talents and gets nowhere. Of course, poise is dependent mainly upon sound health and steady nerves. If you feel that you are being kept back in this way why not turn to that great woman's remedy, Lydia E. Pinkham's Vegetable Compound, which was manufactured from a thorough understanding of the nervous system of women?

A COMPLETE DRUG STORE
Do you ever stop to think what it means to have such a complete drug store at your service as this one? Here you have such a wide variety of stocks to select from that you may come in here and satisfy a vast number of wants that you did not expect to.

OUR TRUCK SERVICE WAS REALLY TESTED THE OTHER DAY
The telephone rang. We answered. A voice: "Hey, Truck Repair, come out and get us. We've toppled over in the ditch." It was but a moment's work to have the service car cranked and be on our way to the scene of the accident.
We found the truck in the ditch and got 'er out. We looked 'er over and then told the owner that we could take 'er in under her own power.
We did. We took the truck to the shop and it's now out on the road, working as it always did.
That's our idea of giving truck owners service.
